INSTRUMENTS AND EXPERIMENTAL TECHNIQUES
Volume 21, Numbers 1-6, 1978

(A translation of Pribory i Tekhnika Éksperimenta)

Volume 21, Number 1, Part 1 January-February, 1978

	Engl.	Russ.
CAMAC System and Microprocessors (Review) – N. M. Nikityuk	1	5
NUCLEAR EXPERIMENTAL TECHNIQUES		
60-keV High-Current Pulsed Electron Accelerator – Yu. L. Bakshaev and É. Z. Tarumov	8	11
Anode for an Accelerator with an Inductive Energy Accumulator – G. I. Dolgachev, P. I. Blinov, and I. N. Slivkov	11	14
System for Measuring Spatial Characteristics of Beam Extracted from Synchrophasotron of the High-Energy Laboratory of the Joint Institute for Nuclear Research – V. I. Volkov, I. A. Eliseeva, L. A. Leonov, and V. F. Sikolenko	14	16
Measurement of Quasifree Neutron-on-Neutron Scattering in Cyclotrons – V. I. Grantsev, I. P. Dryapachenko, V. A. Kornilov, O. F. Nemets, V. M. Pugach, B. A. Rudenko, B. G. Struzhko, and O. M. Bilaniuk	17	20
Scintillation Spectrometers Based on the Flight Time – S. A. Bunyatov, B. Zh. Zalikhanov, V. S. Kurbatov, and A. Khalbaev	21	23
Measurement of Spectra of Alpha Particles in Coincidence with Characteristic X Radiation and Gamma Radiation – V. I. Vakatov, Kh. Zodan, R. Kalpakchieva, Yu. Ts. Oganesyan, Yu. É. Penionzhkevich, V. N. Polyanskii, and L. P. Chelnokov	24	26
Application of Mössbauer Spectroscopy for Phase Analysis – V. I. Nikolaev, V. M. Belova, and S. Yu. Stefanovich	28	30
Position-Sensitive Ionization Fission Chamber – V. S. Gal'tsov, I. I. Zakharkin, V. A. Kuznetsov, and O. I. Shchetinin	30	31
Investigation of Amplitude Characteristics of Scintillation Counters – I. V. Glavanakov and V. N. Stibunov	32	33
Heavy-Charged-Particle Detectors Based on Fluoroplastics – S. P. Tret'yakova and L. V. Dzholos	35	36
Large-Volume Proportional Gas Counter for Measuring Low Concentrations of Tritium – Yu. F. Baryshev, V. F. Volkov, V. I. Smirnov, G. M. Ter-Akop'yan, M. S. Khozyainov, and L. P. Chelnokov	40	41
EXPERIMENTAL APPLICATIONS OF COMPUTER ENGINEERING		
System of Automation of Measurements and Processing of Data from Thin-Layer Chromatograms – V. Ya. Pisanov, G. A. Afanesenko, and L. B. Kaminir	42	43
Microcircuit Program Device for Analog Signal Switching – S. K. Malyshev, S. P. Chekalev, and S. A. Shmulevich	45	46
Direct-Reading Photometry System with Automatic Instability Correction – M. P. Grishin, Sh. M. Kurbanov, and V. P. Markelov	47	48
Multichannel Analog Memory – N. N. Balamatov and A. A. Sotsilenkov	50	50
ELECTRONICS AND RADIO ENGINEERING		
Two-Dimensional Buffer Store Based on a Multichannel Amplitude Analyzer – V. L. Dadykin and A. L. Tsyabuk	53	53
Use of Multichannel Analyzers for Simultaneous Measurement of Two Synchronously Occurring Time Processes – Yu. V. Baldokhin, G. V. Popov, and V. A. Bokov	55	55

	Engl.	Russ.
Automatic Channel-Width Switching in NTA-512B Analyzer in Multichannel Counting Mode – I. I. Gainish and A. A. Teke	57	57
Long-Time Analog Memory – Yu. A. Alabuzhev	58	58
Stabilized Differential Discriminator with Automatic Threshold Control – G. Yu. Besednov and A. G. Leshchinskii	59	59
High-Speed Broadband Amplitude Discriminator that Does Not Change Pulse Duration – V. O. Orlovskii, L. L. Kir'yakov, V. I. Kravtsov, and E. A. Chemes	62	61
System for Stabilization of Spectrometric Channel with Automatic Reference Peak Search – B. N. Veits, Yu. V. Klyuchinskii, and R. A. Lein'	63	63
Scale Stabilizer Based on ^{40}K Photopeak for Scintillation Detector – A. K. Sheremet'ev	65	65
Precision Sample and Hold Circuit – L. A. Dubitskii and V. N. Osipov	67	67
D-Flipflop Decade Counter – G. L. Mizyuk and N. I. Shcherbinin	71	70
Pulse-Time Resistance-to-Voltage Converter – L. I. Tsytovich and V. G. Maurer	72	71
High-Voltage Mega-Amp Arc Gap with Destructible Electrodes – G. S. Villeval'd, V. N. Karasyuk, and G. I. Sil'vestrov	76	75
Thyristor Pulse Modulator for 8-mm-Waveband Klystron – A. A. Antipin and A. A. Fedii	78	77
Free-Running Multivibrator Using Complimentary MOS Transistors – L. F. Berzin and A. L. Yakimakha	80	78
Monostable Multivibrator – A. M. Izmailov	82	80
Generator of Ultralow-Frequency Signals – A. N. Lapin, M. Z. Korytnyi, L. T. Sushkova, E. Ya. Marchenko, and A. G. Samoilov	83	81
Ultralow PRF Pulse Generator – I. D. Goncharenko, V. E. Korepanov, and I. A. Yatsun	85	84
Multichannel Random-Signal Generator – E. Ya. Marchenko, V. I. Klenov, V. V. Isakevich, and L. T. Sushkova	87	86
Wide-Band High-Gain Amplifier – A. I. Dobretsov, V. A. Karzhavin, and Yu. A. Tuflin	89	88
Wide-Band Low Noise Amplifier with High Dynamic Range – N. M. Panin, A. N. Mitrokhin, and N. S. Lozovaya	92	90
Low-Noise Preamplifier with Pulsed Drain Negative Feedback – V. A. Tret'yakov and S. V. Bakhlanov	94	93
Low-Noise Preamplifier with Continuous Drain Negative Feedback – V. A. Tret'yakov and S. V. Bakhlanov	98	97
Tracking Amplitude and Phase Meter for Low-Frequency Sinusoidal Signals – A. D. Ivliev and V. E. Zinov'ev	102	101
Phase Meter with Reduced Error from Nonlinear Input-Signal Distortion – A. M. Fishtein	105	104
High-Speed Phase Comparator – A. V. Purtov and Yu. F. Mukhopad	110	109
Wideband Phase Shift Circuit – V. A. Ivanov and I. I. Tarasenko	112	111
Amplitude Digital Voltmeter – V. G. Grinev and L. V. Grineva	114	113
Linear Voltage-Controlled Resistor – N. M. Zolotova	117	116
Optically Coupled Electronic Chromometer – G. S. Dragun	118	118
Digital Electronic Time Delay Relay – P. I. Malii, A. I. Solov'ev, and V. S. Shchepin	122	121
Digital Frequency Multiplier Based on a Counter Divider Type IKZ-15 – A. N. Zelenin, A. V. Il'chenko, P. D. Botsman, V. P. Shinkarenko, and A. D. Manyailo	124	124

Volume 21, Number 1, Part 2 January-February, 1978

ELECTRONICS AND RADIO ENGINEERING

	Engl.	Russ.
NMR Frequency-Ratio Spectrometer for Studying Isotopic Effects of Light Nuclei – Yu. I. Neronov and Yu. P. Mikhailichenko	127	125
Autodyne Detector of Acoustic Nuclear Magnetic Resonance – I. I. Sadykov	131	129
Pulsed Magnetic-Field Gradient Program for Studying Diffusion of Adsorbed Molecules by the Spin-Echo Method – A. V. Anisimov, A. S. Evarestov, and V. A. Zuikov	134	132
Recording Unit for Electron Parametric Resonance (EPR) Signals at Modulation Frequency of a Magnetic Field – S. S. Vetokhin, N. I. Kotovich, and V. N. Linev	137	134

Multichannel Hybrid Power Splitter for Meter and Decimeter Wavelength Range — V. S. Mikhailov and D. A. Voronchenko	139	136
Resonance Method of Determining Parameters of Magnetodielectric Materials in a Cylindrical Waveguide — Yu. G. Makeev and V. A. Korobkin	142	139
Instrument for Measuring Specific Electrical Conductivity in Electrolyte Flows — S. A. Gorozhankin and A. A. Zori	145	141
Wide-Range Magnet-Current Regulator for the RÉ1301 Microwave Spectrometer — B. F. Alekseev and A. I. Mamykin	147	143
Precision Power Stabilizer — L. B. Mashkinov, A. B. Petukhov, and L. N. Gal'perin	149	145
GENERAL EXPERIMENTAL TECHNIQUES		
Apparatus for Measuring Speed of an Electrical Discharge — V. T. Kazub and G. S. Korshunov	151	147
Obtaining a Modulated Beam of Hydrogen Atoms with Energies of 3-15 keV — G. V. Roslyakov and V. Ya. Savkin	153	148
Use of Ionization Detector to Record Modulated Molecular Beam — A. A. Vostrikov, Yu. S. Kusner, A. K. Rebrov, and B. E. Semyachkin	156	150
Electric-Discharge Pressure Gauge for Cesium Vapor — V. A. Subbotin, A. M. Bryuzgin, Yu. G. Cherednichenko, É. Kh. Khachaturov, and E. S. Cherednichenko	158	152
Magnetic-Discharge Manometer with Two Coaxial Anodes — V. N. Pakulin	160	154
Study of Dynamic Characteristics of UMI-93ShS Image Converter — G. I. Bryukhnevich, N. S. Vorob'ev, Yu. N. Serdyuchenko, and M. Ya. Shchelev	162	156
Operation of Image Converter with a Ring Gate in One-Frame Mode with Nanosecond Exposures — B. E. Dashevskii, Yu. N. Serdyuchenko, V. K. Chevokin, and M. Ya. Shchelev	166	159
Electronic Switch for Intermittent Photomultipliers — V. T. Shkatov and B. P. Aduev	170	163
Laser Ion Source for Mass Spectrometer MI-1309 — A. I. Busygin and B. Sh. Ul'masbaev	171	164
Investigation of Effect of Constructional Features of Superconducting Solenoids on Their Magnetic Parameters — E. N. Lysenko	175	168
Optimization of a Superconducting Solenoid with Variable Current Density — V. P. Buryak, V. I. Kurochkin, E. N. Malyshev, and G. M. Kravchenko	179	171
Optimum Dimensions of a Bitter Solenoid — A. A. Udod	181	173
Apparatus for Displaying Dynamic Magnetization Curves on an Oscilloscope — A. V. Fedotov	184	175
Method of Measuring Barkhausen Noise — V. M. Vasil'ev	188	179
Sensitivity of Silicon-Whisker Strain Transducers to Elastic Pulses in the −50 to +110°C Range — G. A. Abramchuk	191	181
Calibration of Devices Producing Anisotropic Strain — M. P. Volotskoi	193	183
Pulsed Source of Ultraviolet Radiation — L. G. Karpov, S. I. Lozovoi, and Yu. I. Sergeev	195	184
Automatic System for Examining Semiconductor Two-Photon Absorption Spectra — V. I. Gavryushin, V. K. Narkyavichus, and R. A. Baltrameyunas	197	186
Measurement of Polarization of Short Light Pulses — V. K. Kalevich, V. G. Fleisher, and V. D. Kul'kov	199	188
Optical Heterodyning in Ultrasonic Speed and Absorption Measurement — B. A. Strukov, E. D. Yakushkin, K. A. Minaeva, and V. I. Teleshevskii	204	192
Method of Reducing Intermediate Frequency in Optical Heterodyning — V. R. Zaslavskaya and G. G. Chizhikov	207	195
Measurement of Phase Distribution in a Laser Beam — N. K. Berger, I. A. Deryugin, and A. V. Mikheenko	209	197
Compact CO_2 Laser — V. V. Osipov, P. A. Slobodyanyuk, and V. A. Tel'nov	211	198
Wide-Band Tunable Laser Locking System — V. G. Gol'dort, V. F. Zakhar'yash, and B. A. Kurnevich	213	201
Miniature Laser Power Measurer — A. I. Teslenko, V. D. Kukush, and L. A. Didyk	217	204

Laser Doppler Velocimeter – A. F. Kovylov, S. B. Kormer, A. V. Pinegin, B. A. Poklontsev, and K. B. Yushko 219 205
Low-Powered Transmission X-Ray Tube for Exciting X-Ray Fluorescence – V. A. Berdikov, O. I. Grigor'ev, B. S. Iokhin, and G. M. Nikolaenko 221 207
Study of Distribution of Structural Imperfections in Silicon Wafers by "Limited Topogram" Technique – V. N. Leikin, T. A. Mingazin, and V. I. Zelenov 224 209
X-Ray Collimators – V. I. Lisoivan, R. R. Dikovskaya, and V. I. Sedin 226 211
Sensor for Soft X-Ray Spectroscopy of Excitation Potentials – A. Yu. Mityagin, V. P. Orlov, and N. I. Tumanova 229 214
Apparatus for Studying Parameters of Metal–Dielectric–Semiconductor Structures by Conductivity Method – S. V. Belotelov, R. A. Suris, and V. N. Fedorov 231 216

LABORATORY TECHNIQUES
Increased Recording Speed for Wide-Band Oscilloscopes – V. I. Zhavoronkov 236 220
Improved Variant of the "Rubin-1" Linear Voltmeter – O. M. Nilov and V. A. Karpov 237 221
Optoelectronic Switch – V. P. Sharov, G. I. Iz"yurova, and E. M. Fadyukov 238 222
Effective Thermal Source of Fluorine Atoms – V. S. Arutyunov and A. M. Chaikin 240 224
Transparent Electrically Conductive Coatings Using Highly Dispersed Metallic Oxides – Yu. I. Petrov and M. A. Manaevskii 242 226
Measuring Chamber for Study of Optical Characteristics of Substances at High Temperatures – A. A. Emel'yanov and E. I. Averkov 245 229
Attachment for UR-10 Spectrophotometer for Study of Small Objects at Low Temperatures – I. G. Bronshtein, V. T. Prokopenko, V. S. Rondarev, and A. D. Yas'kov 247 230
Device for Measuring Viscosity of Liquids and Shape Factor of Solid Particles – S. M. Aizin, Yu. A. Gridnev, A. S. Zherebovich, T. A. Kalinina, I. A. Kleinman, and A. G. Segalla 248 231
High-Temperature Chamber Attachment for X-Ray Diffractometer – V. V. Pet'kov, V. G. Epifanov, A. V. Zavilinskii, V. É. Is'yanov, A. V. Polenur, V. P. Podoroshnii, and I. V. Nikishin 251 234
Compensation for Differences in Thermal Expansion during Thin-Film Measurements – Yu. I. Shmatok and M. A. Markman 253 236
Evaporative Thermal Siphons for Intensifying Heat Exchange – E. A. Kolenko 254 237

NEW INSTRUMENTS
"Neptun" Data and Measuring System – A. A. Yaremchuk, P. P. Ornatskii, L. I. Gusev, N. E. Taraban, and Yu. A. Gorovoi 257 240
Control Panel for Computer Input/Output of Data from Thermophysical Experiment – V. V. Vlasov, V. N. Kazakov, V. E. Podol'skii, V. I. Nesterov, and A. I. Nikitin 258 241
Multichannel Monitoring and Measuring System – V. S. Grubnik, V. D. Mikhotin, V. M. Tikhonov, and V. M. Shlyandin 259 242
Follow-Up Spectrum Analyzer – A. V. Asmolovskii, A. T. Zhabskii, B. N. Kanev, G. M. Poltorak, and V. Sh. Yakhin 260 243
Electron Paramagnetic Resonance Spectrometer – A. M. Belonogov, D. P. Volnyagin, V. Z. Drapkin, V. V. Zayats, V. V. Ovcharov, V. A. Pashinskii, A. S. Serdyuk, and I. I. Ugolev 261 244
Alternating-Voltage Ratio Meter – V. T. Vasil'ev, V. K. Popov, A. A. Safronov, and V. S. Sharitonov 262 244
Portable Picoammeter–Teraohmmeter – V. I. Kozus' and G. P. Shpen'kov 263 245
Logic Tester – A. V. Petrash and A. M. Naumovets 264 245
Power Supply – V. A. Vlasov, E. I. Gol'dshtein, and Yu. A. Astrakhantsev 265 246
SKIF-1, an Instrument for Measuring Spectral-Line Profiles – V. T. Goloborod'ko, Yu. M. Kiselev, and L. P. Nemashkalo 266 246
Instrument for Separating Weak Signals from Noises – S. S. Katushonok, M. V. Komar, A. G. Laruchkin, L. I. Shestakova, and S. S. Shushkevich 267 247

High-Pressure Optical Cuvette – Ya. I. Shurin, F. V. Zhurko, and V. L. Bogatyrev 268 247
Television Infrared Microscope – V. T. Prokopenko, V. S. Rondarev, and A. D. Yas'kov... 269 248

Volume 21, Number 2, Part 1 March-April, 1978

To the Authors and Readers of Pribory i Tekhnika Éksperimenta (Instruments and Experimental Techniques) 271 5
Proportional and Drift Chambers in Applied Research (Review) – Yu. V. Zanevskii and V. D. Peshekhonov 272 7

NUCLEAR EXPERIMENTAL TECHNIQUES
Methods of Increasing the Intensity of a Beam of Heavy Ions in a Synchrotron – I. A. Shukeilo 293 27
Use of a Dielectric in Charged-Particle Beam-Position Detectors – N. I. Zinevich and V. P. Cherepanov 296 30
"Frozen" Polarized Proton Target – N. S. Borisov, É. I. Bunyatova, Yu. F. Kiselev, V. N. Matafonov, B. S. Neganov, and Yu. A. Usov 299 32
Anti-Compton Spectrometer with Ge(Li) Semiconductor Detector – Hoang Dak Lyk 308 41
Identification of Nuclides from Scintillation β Spectra – V. M. Ékkerman and T. N. Seredenko 310 42
Ion-Doped Semiconductors Coordinate Detector for Charged Particles – T. A. Agrba, I. G. Gverdtsiteli, A. I. Guldamashvili, V. D. Zhirnov, and T. A. Shaumyan 313 45
Experimental Determination of the Dead Time of Ionizing Radiation Detectors – A. S. Dubovenko, N. S. Pronkin, and O. V. Rogozhin 315 46
Memory Time of Gas-Discharge Converters of X-Ray Pictures with Neon Filling – V. I. Vystropov 318 49
Calculating the Spectral Characteristics of Thin Cylindrical Scintillators for Fast Neutron Spectrometry – E. M. Burymov, S. V. Lovtsov, and I. V. Teplov..... 320 51
Scintillation Detector for Measuring the Transit Time and Interaction Coordinates of Neutrons – S. A. Bunyatov, B. Zh. Zalikhanov, V. S. Kurbatov, and A. Khalbaev..... 323 54
Kinetics of Scintillation in Condensed Xenon – T. Ya. Voronova and I. M. Obodovskii 326 56
Temperature Characteristics of α-Datum Stabilizers – A. Ya. Sinitsyn and R. M. Gabitov..... 328 58
Effect of a Pulsed Electric Field on Nuclear Emulsion Exposed to Cosmic Rays – A. B. Akopova, N. V. Magradze, L. V. Melkumyan, and I. P. Prokhorenko 330 59
Source for Mössbauer Studies Based on ^{197}Hg – V. G. Tsinoev and E. P. Stepanov 332 61

EXPERIMENTAL APPLICATIONS OF COMPUTER ENGINEERING
One-Arm Magnetic Spectrometer of the "Alfa" Facility. Description and Characteristics of Spectrometer. Operational Organization – V. G. Ableev, S. G. Basiladze, Yu. T. Borzunov, G. G. Vorob'ev, L. B. Golovanov, S. A. Zaporozhets, V. I. Kakurina, A. I. Kruglov, B. K. Kuryatnikov, P. K. Man'yakov, E. A. Matyushevskii, A. A. Nomofilov, A. N. Parfenov, V. D. Peshekhonov, N. M. Piskunov, A. D. Rogal', V. N. Sadovnikov, I. M. Sitnik, E. A. Strokovskii, L. N. Strunov, G. M. Susova, A. P. Tsvinev, V. I. Sharov, and V. K. Yudin..... 334 63
System of Automatic Measurement of the Characteristics of the Electronic Apparatus of a 90-Channel Čerenkov Mass Spectrometer – S. G. Basiladze, V. A. Kramarenko, V. Oleinichak, and M. N. Khachaturyan..... 342 70
Electronic Apparatus of a 90-Channel Čerenkov Mass Spectrometer – R. G. Astvatsaturov, S. G. Basiladze, V. I. Ivanov, E. Knapik, V. A. Kramarenko, A. I. Malakhov, G. L. Melkumov, A. N. Parfenov, B. M. Starchenko, and M. N. Khachaturyan..... 345 73

Control of Codes of Coordinate Registers by a System of Control Generators — M. N. Rashchinskii and É. P. Katilas. 350 78
Converters Operating between Binary and BCD Representations — G. N. Zimin, V. P. Perelygin, and S. P. Perelygin. 353 80
Analog-to-Digital Converter with Differential Integrator — N. I. Zheludkov 355 83
High-Speed Analog-to-Digital Converter — M. I. Demchuk, V. N. Khaiminov, and V. N. Denisenko 358 85
Enhancement of the Linearity of an Analog-to-Digital Converter — S. U. Klimovich and I. P. Steklova. 361 88
Shaft Position-to-Digital Converter — A. N. Buldakov, V. I. Kovalenok, V. E. Smirnov, and S. A. Kolchedantsev. 363 90
Follow-Up Multichannel Telemetry-Signal Decoder Based on a Multiple-Valued Logic Element with Intermediate Spatial Conversion of Data — G. V. Basalaev and Z. D. Konoplyanko. 365 91
Device for Experimental Data Based on a Narrow-Tape Recorder — S. K. Malyshev, V. M. Demarev, I. A. Makeeva, S. P. Chekalev, and I. I. Shishenko 368 94
New Method of Digital Magnetic Recording — A. A. Karlov and S. P. Perelygin 371 97
Construction of Buffer Store of Alphanumerical Printer — F. G. Garipov and A. A. Babanin. 374 100
Recording Auxiliary Information with B3-15 Digital Printers — A. I. Efimenko 377 103
Matching Device for F5033 Transcriber for Simultaneous Recording of Data on an ÉUM-23D Typewriter and UVL-75/20-1 Tape Puncher — I. I. Barbetov and V. I. Polyubin. 378 104

ELECTRONICS AND RADIO ENGINEERING
Operational Organization of Storage of AI-128-2 Pulse-Height Analyzer in Multichannel Counting Mode — V. V. Bagaev, I. F. Kalinkevich, Yu. V. Maidl', and I. E. Tomashevskii 382 108
Scaling Decade with LED Display — V. B. Volkonskii, I. V. Selyutin, and V. V. Yakovlev. 384 110
Frequency-Pulse Threshold Device — F. G. Garipov and A. A. Babanin 386 111
Thyristor Univibrator — B. A. Volkov and A. A. Babanin 388 113
High-Voltage Generator for Controlling an Accelerator Beam — V. A. Safonov and V. V. Glushikhin 389 114
Generators of High-Voltage Nanosecond Pulses of Complex Shape — G. P. Bazhenov, V. I. Manylov, V. G. Shpak, and S. M. Chesnokov. 392 117
Generator of Packets of Powerful Bipolar Pulses with a High Duty Frequency — V. I. Vystropov and V. K. Kuleshov. 396 121
Current Pulse Generator — G. L. Chakhlov 398 123
Nanosecond Pulse Generators Based on Avalanche Transistors with Low-Voltage Power Supply — V. P. D'yakonov 401 126
Nanosecond Delayed Pulse Generator Based on an Avalanche Transistor — V. P. D'yakonov 403 127
Improvement of Metrological Characteristics of High-Speed Regenerative Generators with Delayed Feedback — A. V. Gerasimov and V. A. D'yakov. 404 128
Generator of Infrafrequency Random Process — V. M. Glushan', I. M. Zarubin, and V. V. Svishchev 407 131

Volume 21, Number 2, Part 2 March-April, 1978

ELECTRONICS AND RADIO ENGINEERING
Pulse-Delay Generator — V. G. Bartenev 409 133
Controlled Precision Delay Line — Yu. V. Alekseev, S. T. Latushkin, V. A. Rezvov, and L. I. Yudin. 411 135

Printed Symmetrical Delay Line – V. N. Vishnevskii, V. M. Nemirovskii, and G. I. Khodak	414	137
Scheme for Strobing Pulse Signals – V. F. Borzhkovskii, V. G. Vlasov, N. K. Mukhachev, N. G. Stervoedov, and A. I. Frolov	417	140
High-Speed Automatic Pulse Signal Standardizer – M. V. Brunov, V. P. Golovkov, and A. I. Golyshev	419	142
Logarithmic Converter Using Integrated-Circuit Operational Amplifiers – A. N. Volgin, A. V. Vygovskii, and V. A. Domin	425	148
Pulse Amplifier with Digital Gain Control – V. F. Borzhkovskii, V. G. Vlasov, V. G. Batii, N. G. Stervoedov, and A. I. Frolov	427	150
Differential Operational Amplifier with Improved Response Time – N. N. Prokopenko	429	153
Relay Operational Amplifier – L. I. Tsytovich, B. A. Petrenko, and V. G. Maurer	431	154
Amplifier Stages with Controllable Gain – O. I. Andronov, V. G. Brovchenko, and M. M. Tsygankov	434	157
Wideband dc Amplifier – O. G. Rezvanov and V. M. Nemirovskii	437	160
Frequency Divider Using Dual-Gate Field-Effect Transistor – V. V. Inozemtsev	439	162
Converter of Phase Difference of uhf Oscillations to Pulse Count – A. A. Protopopov and V. A. Protopopov	441	164
Pulsed Phase Detector – A. V. Itskovich	443	166
Synchronous Detector for an Electron-Spin-Resonance Spectrometer – V. N. Linev and V. B. Mochal'skii	444	167
Precision Bipolar-to-Unipolar Signal Converter – O. I. Nikolaichuk and S. S. Sliva	446	169
Millimeter-Wave Magnetoresistive Pulse-Power Measuring Instrument – L. I. Kats, E. V. Sinitsyn, and A. Yu. Somov	448	171
Multichannel Oscillograph – I. G. Larin, V. A. Rezvov, and L. I. Yudin	450	172
Digital Nanosecond Time-Interval Meter for Cathode-Ray Oscillograph – V. N. Vishnevskii and N. A. Kukharenko	453	176
Controlled-Delay Marker Circuit for Oscillograph – V. S. Batrachenko and S. K. Boyarskii	455	177
Stabilized High-Voltage Converter – G. P. Petin and A. A. Martirosyan	456	178
Regulated Source of Bipolar Voltage – V. I. Zametin, V. A. Zazulin, and A. N. Putilin	457	180
Voltage Regulator with Low Output Resistance – A. V. Nikulin	459	181
GENERAL EXPERIMENTAL TECHNIQUES		
Radioisotope Pressure Transducer with Linear Scale in the Range of 100-1000 torr – V. A. Chernyshev, S. T. Pantyukhov, and A. P. Kharin	460	183
Electronic Flowmeter for Determining Low Gas Pressures – B. V. Zubkov, A. V. Sermyagin, S. V. Umanskii, and V. N. Khromov	462	185
Pulsed Electron Gun with Emission into the Atmosphere of a Stream of Large Cross Section – Yu. V. Grigor'ev and L. P. Shanturin	464	187
Differential Evacuation System for the Emission of an Electron Beam into the Atmosphere – V. A. Artemov, O. A. Malafeev, A. V. Reder, A. V. Rykhlov, and V. A. Safonov	468	190
High-Frequency Source of Low-Energy Ions – B. A. D'yachkov, N. M. Zaryankin, V. I. Logunov, and A. V. Nasonov	469	191
A Source of Metal Ions – V. A. Gruzdev, Yu. E. Kreindel', and A. P. Semenov	471	193
The IRT-4 High-Voltage Pulsed Discharger – Yu. D. Khromoi, V. P. Andronova, R. G. Antokhin, A. M. Serbinov, and V. I. Sysun	473	195
"Plasma" Probe for Measuring the Plasma Potential and Its Fluctuations – N. F. Balaev	476	197
Modified Method of Pulsed Condensation of Matrix for Spectrocryogenic Research – O. G. Garkusha	478	200
Effect of Power Supply and Focusing Conditions on Output Signal of Dissector – S. S. Vetokhin and I. V. Reznikov	481	202

Installation for Investigating the Isothermal Compression of Solid Hydrogen up to 25 kbar at Temperatures of 60-130°K – Yu. M. Pavlyuchenko, A. N. Utyuzh, V. V. Kechin, A. I. Likhter, L. Z. Ponizovskii, and A. P. Novikov 483 204
Optical Chamber with a Fixed Pressure of up to 16 kbar for a Wide Range of Low Temperatures – V. B. Anzin, M. V. Glushkov, M. I. Eremets, E. S. Itskevich, Yu. V. Kosichkin, and A. M. Shirokov 487 208
Low-Temperature Ruby Laser with an Optical Delay Line inside the Resonator – L. S. Kornienko and B. G. Skuibin 489 210
Detachable Pumping Lamps for an Organic-Dye Laser – M. F. Lagutin, N. P. Mustetsov, and A. A. Zarudnyi 491 212
Three-Slit Optical Diverging System – G. N. Buré, G. M. Efremov, V. V. Kupriyanov, and S. F. Palamarchuk 493 213
Measurement of the Dynamic Response of Materials to the Impact of a Pulsed Electron Beam by the Interferometric Method – B. F. Gulin, Yu. I. Meshcheryakov, V. A. Morozov, and Yu. V. Sud'enkov 495 215
Optical Instrument for Measuring Pulsed Pressures – A. A. Bakeev, I. V. Bykov, L. A. Vasil'ev, A. I. Fedosimov, and V. I. Yakovlev 498 218
Recording Short Light Pulses of Low Intensity with a Photomultiplier with a Capacitive Load – G. D. Bogomolov, Yu. V. Dubrovskii, and A. A. Letunov 501 220
Apparatus to Investigate Excited Molecules by the Method of Photoelectron Spectroscopy – A. I. Dolgin, V. I. Il'in, and F. I. Vilesov 504 223
Apparatus for Examining the Emission Spectra of Gas Mixtures Produced by Alpha Particles – V. S. Il'yashenko, A. I. Mis'kevich, and B. S. Salamakha 506 225
Standard Spectrophotometers in Examining Circular Dichroism for Scattering Objects – Yu. N. Korolev, M. V. Gusev, and N. L. Telegin 509 228
Instrument for Hall Measurements in Strong Electric Fields – V. N. Dobrovol'skii, Yu. S. Zharkikh, and A. N. Krolevets 511 230
Dispersive X-Ray Photographic System – V. A. Boiko, S. A. Pikuz, and A. Ya. Faenov 513 232
Multicrystal X-Ray Spectrometer – V. D. Skupov 517 236
Apparatus for Measuring the Sensitivity and Data-Density Characteristics of Electron-Sensitive Materials – S. F. Golub, N. P. Kupreichik, A. M. Lisov, and K. G. Predko 518 237
High-Efficiency Combined Branches for Film Thermopiles – V. N. Vigdorovich, G. A. Ukhlinov, and N. I. Chibotaru 521 240

LABORATORY TECHNIQUES

Photosensitivity Variation in a Semiconductor Ionizing-Radiation Detector – A. B. Meshcheryakov 524 242
Evacuated Chamber with Specimen Cooling via a Mechanical Switch – V. V. Permyakov, N. E. Unesikhin, A. V. Vdovin, and I. G. Gavrish 525 243
Preparation of Subgroup IV Chalcogenides in a Double Quasiclosed Volume – D. M. Freik, N. T. Maslyak, Ya. V. Solonichnyi, A. N. Grushin, and V. M. Shperun 527 245
Ion-Bombardment Erosion of a Lithium Niobate Single Crystal – L. D. Pokrovskii 529 247
Device for Sealing High-Pressure Gas-Discharge Devices – R. M. Khatapova and Yu. B. Glushanok 531 249
Pressure Measurement from ESR in Isostructural Ferroelectrics – A. I. Filippov 532 250
Ampul for a Liquid Sample for NMR Studies under Pressure – V. P. Arkhipov and F. M. Samigullin 533 251
Method of Determining Dopant and Defect Distributions in a Diffusion Layer – L. A. Koledov and L. N. Sergeev 536 253
Sealed Cell for Examining Powder Specimens on an X-Ray Diffractometer – I. A. Belitskii and G. P. Valueva 537 254
Determination of Particle Size by a Conductometric Method – M. I. Shustov 540 257
Miniature Cold-Cathode Rectifying Diodes – A. F. Kozhukhar' and V. A. Vasin 542 259

Cryostat for Adjustable Cooling of an Open Refrigeration Tube — V. M. Boichuk, É. A. Amelin, N. N. Volikov, G. V. Pevitskii, and V. E. Losev 544 261

NEW INSTRUMENTS

RNB-76 Monitor for Low-Energy β-Emitter Contamination — E. I. Dolgirev, G. N. Kaidanovskii, and V. V. Nazarov 547 263

Multichannel Light-Flux Recording System — M. I. Demchuk, V. N. Denisenko, and V. N. Khaiminov 548 264

BKCh-1 Frequency and Time Digitizer — G. I. Kuznetsov, A. M. Glazkov, G. S. Ratanov, and L. G. Shelekhov 549 265

SZU-256 ×12 Specialized Semiconductor Store — G. I. Kuznetsov, A. N. Kravchenko, G. S. Ratanov, and L. G. Shelekhov 550 266

Stabilized Power Source for an Electron Gun — G. A. Bogdanovskii and A. A. Zelenov 551 267

Contact Potential Difference Meter — A. L. Zharin and G. P. Shpen'kov 551 267

UFS-01 High-Resolution Fourier Spectrometer — A. A. Balashov, V. S. Bukreev, V. A. Vagin, G. N. Zhizhin, N. G. Kul'tepin, and I. N. Nesteruk 552 268

Multichannel Electric Thermometer — A. A. Chernyshev and N. D. Shirobokova 553 269

Recorder for Rapidly Occurring Single Processes — Yu. I. Belonosov, A. A. Klishin, É. I. Podol'nyi, M. V. Svintilov, and V. E. Yamnyi 554 269

Six-Piston High-Pressure Device — D. S. Mirinskii and Ya. I. Shurin 555 270

Optoelectronic Instrument for Contactless Visualization of Thermal Fields — V. A. Storozhenko, Ya. A. Volkov, and S. S. Denisov 555 271

Volume 21, Number 3, Part 1 May–June, 1978

Systems Based on Electron-Beam Memory Tubes and Their Use for the Analysis of Single Pulsed Signals in the Nanosecond Range (Review) — S. V. Denbnovetskii, A. N. Shkuro, and I. I. Orlov 557 7

NUCLEAR EXPERIMENTAL TECHNIQUES

Recapture and Moderation of Protons on the Decay of the Magnetic Field in the Accelerator of the Institute of High-Energy Physics — G. G. Gurov 570 19

Filtering of the Six-Dimensional Phase Volume of a Beam in a Linear Ion Accelerator — A. P. Fedotov, S. A. Lukshin, and V. V. P'yankov 573 22

Tuned Power Amplifier for the Supply of the Accelerating Resonator of an Ion Synchrotron — I. I. Averbukh and M. M. Karliner 577 25

Model of a Bipolar Voltage-Pulse Generator — A. S. Vertogradov, A. V. Zhelamkov, Kh. Ryuger, and G. A. Shelkov 579 27

Bipolar Nanosecond Pulse Shaper — L. S. Vertogradov, A. V. Zhelamkov, B. A. Murav'ev, Kh. Ryuger, Kh. Tom, and G. A. Shelkov 584 31

Ion Source with Pulsed Gas Emission — V. A. Batalin, A. A. Kolomiets, B. K. Kondrat'ev, and R. P. Kuibida 588 35

Liquid Ultrasonic Meter for the Intensity of Pulsed Beams of Charged Particles — V. D. Volovik and V. I. Kobizskoi 590 37

Cryogenic Target Containing Liquid Helium, Hydrogen, and Deuterium — L. B. Golovanov, V. L. Mazarskii, and A. P. Tsvinev 593 40

Making Thin Targets for Studying Reactions with Heavy Particles at Low Energies — V. A. Stepanenko, L. N. Starodubtseva, O. Yu. Goryunov, V. N. Dobrikov, O. F. Nemets, and A. T. Rudchik 596 43

Strong-Focusing Magnetic Analyzer for Recording Charged Particles in the Region Up to 700 MeV/c — B. N. Kalinin, V. M. Kuznetsov, G. A. Saruev, N. K. Bulgakov, V. V. Mameev, and N. A. Rybakova 598 45

Method of Optical Wedges for Spatial Reconstruction of Particle Trajectories — T. L. Asatiani, S. V. Alchudzhyan, K. A. Gazaryan, D. Sh. Zograbyan, L. I. Kozliner, V. M. Krishchyan, G. S. Martirosyan, and S. V. Ter-Antonyan 600 47

Effective Method of Experimental-Data Reduction Using the Technique of Multichannel Pulse-Height Analysis – O. A. Anisimov, A. B. Doktorov, and V. D. Zhidkov 602 49
Semiconductor X-Ray Spectrometer with Optical Feedback – A. M. Zubareva, S. Iliev, V. F. Kushniruk, A. V. Rykhlyuk, V. G. Subbotin, and Yu. P. Kharitonov 604 50
Possibility of Identifying Particles with Different Charges in Photonuclear Reactions – A. S. Aleksanyan, A. O. Gasparyan, G. K. Megrabyan, G. G. Mkrtchyan, and R. N. Pikhtelev 609 55
Use of Helium Scintillation Counter in a Time-of-Flight Neutron Spectrometer for Measurements in the Energy Interval 0.4-4 MeV – O. D. Brill' 611 57
Installation Based on a Proportional Chamber for Radiographic Investigation of Objects – Yu. V. Zanevskii, A. B. Ivanov, V. D. Peshekhonov, I. A. Tyapkin, and S. P. Chernenko 615 60
Four-Electrode Streamer Chamber – V. D. Volodin, N. S. Glagoleva, N. I. Kaminskii, E. A. Matyushevskii, A. T. Matyushin, V. T. Matyushin, and V. A. Trofimov 621 66
Automatic Measurement of the Ionization of Streamer Tracks – V. V. Koshtoev and E. Ya. Lerman 624 69
Large Low-Background Slow-Proton Detectors – A. I. Afonin, Yu. A. Mostovoi, A. I. Frank, and O. V. Khakhan 626 71
Detection of Low-Energy Heavy Ions – D. S. Andreev, G. M. Gusinskii, and I. Kh. Lemberg .. 628 73
Characteristics of Gallium Arsenide Semiconductor Radiation Detectors – D. M. Aidinova, A. A. Aleksandrov, S. M. Bukki, V. V. Kushin, V. K. Lyapidevskii, R. A. Muminov, and A. Ya. Yafasov 631 76
Coordinate Detectors Based on Liquid Scintillators – B. Yu. Baldin, L. S. Vertogradov, Z. V. Krumshtein, M. A. Musin, V. I. Petrukhin, A. L. Ronzhin, S. L. Smirnova, and I. Shyuler 633 78
Photoelectric Polling of Multiwire Gas Counters – G. D. Bogomolov, Yu. V. Dubrovskii, and V. D. Peskov 639 84
Automatic Measurements of Reference Crosses on Photographs from Bubble Chambers in a Spiral-Meter System – I. V. Gorshenina, N. E. Detinenko, A. A. Ivanov, and and Yu. S. Nechaev 642 87

EXPERIMENTAL APPLICATIONS OF COMPUTER ENGINEERING

Input of Experimental Data into the Nairi-2 Computer – A. V. Zhuk and M. I. Tsema 645 90
System for Collecting and Handling Multiple Analog Signals by Means of the Promin'-2 Computer – D. P. Bernatskii and Yu. K. Ustinov 648 93
Feeding of Data from an Analog-to-Digital Converter to an M-6000 Computer –A. M. Kalashnikov and A. K. Sheremet'ev 652 96
Fast Digital Processor for Sorting Events according to Particle-Count Difference – S. G. Basiladze, B. N. Gus'kov, Li Wan Sung, A. N. Maksimov, and A. N. Parfenov ... 653 98
Device for Interfacing of a Common Magnetic Recorder with an Electronic Computer – A. Ya. Galata and Ya. M. Zlotnikov 656 100

ELECTRONICS AND RADIO ENGINEERING

High-Speed Reversible Decade Counter – V. V. Blatov and A. A. Chudov 659 103
Controlled Digital Shaper of Time Intervals – V. I. Borodatyi 662 106
Time – Amplitude – Time Converter with Large Conversion Coefficient – V. G. Demenkov, Yu. S. Kulabukhov, V. S. Nesterenko, L. A. Timokhin, and S. I. Chubarov 665 109
Vernier Converter for Nanosecond Time Intervals – V. N. Vishnevskii and G. I. Khodak 668 112
Nanosecond Analog-to-Digital Converter with Gray Code Output – A. P. Novitskii 670 113
High-Speed Frequency – Time Code Discriminator – E. E. Gofman, N. V. Kirianaki, and I. N. Les'kiv 672 115
Converter of Resistance to Pulse-Repetition Period – Li Wan Sung and E. A. Silaev 675 118
Two-Channel Instrument Current Transformer – G. A. Kell and V. D. Privalov 678 121
Angle-to-Code Converter – A. E. Golovin and I. V. Naumov 680 123

Precision-Amplitude Pulse Generator for the Monitoring and Stabilization of a Spectrometer System – E. V. Lazutin, Yu. V. Kuznetsov, I. M. Piskarev, V. A. Khrushchev, and V. P. Popov 683 126
High-Power Crystal Oscillator – É. P. Kavun 685 128
Generator for Rectangular Nanosecond Pulses Using Avalanche and High-Power Transistors – V. P. D'yakonov 686 129

Volume 21, Number 3, Part 2 May-June, 1978

ELECTRONICS AND RADIO ENGINEERING

Generator of Coded Series of shf Picosecond Pulses Based on Avalanche Transistors – V. P. D'yakonov 689 131
Multichannel Generator of Nanosecond Pulses – I. G. Larin, S. T. Latushkin, V. A. Rezvov, and L. I. Yudin 691 132
Nanosecond Pulse Shapers Based on Avalanche Transistors and Powerful shf Transistors – V. P. D'yakonov and A. I. Profatilov 693 134
Control-Pulse Shaper for a Microwave Spectrometer – A. V. Rusanov, A. F. Babkin, and A. N. Yazov 696 136
Semiconducting Shaper of Ignition Pulses for Laser-Pumping Lamps – R. Z. Besedovskii, K. A. Kondrat'ev, M. A. Sungurovskii, and V. I. Shchupak 698 138
Pulse Expander – G. A. Dmitriev and I. A. Antonova 700 139
Integrated Code Discriminator – V. V. Koshtoev and E. Ya. Lerman 701 140
Counter of Radio Pulse Carrier Frequency – V. V. Blatov and A. A. Chudov 702 141
Automatic Control System for the MÉP-2 Modulator of the "Crion" Ion Source – V. G. Dudnikov 706 145
Self-oscillator Electrometric Amplifier with MIS Varicaps – V. V. Medvedev, A. K. Osipov, and S. A. Shobotenko 708 146
Broadband Preamplifier for a Nuclear-Magnetic-Resonance Pulsed Spectrometer – B. L. Cherkasov and G. I. Dotsenko 710 148
Instrument Method of Determining Sign of Correlation Coefficient of Random Processes – A. V. Blokhin and M. I. Kolodin 712 150
Increased Accuracy in Audio-Frequency Measurements with the S4-12 and S4-53 Spectrum Analyzers – S. M. Bezrukov and N. I. Preobrazhenskii 714 152
Variable Electrical Delay Line – S. F. Simovskaya, V. S. Golikov, V. B. Klimushev, I. L. Shugaev, and A. G. Kochergin 716 153
Phase Shifter with Stable Gain – V. V. Brailovskii, O. P. Zhuk, and A. R. Shelyag 718 155
Magnetoresistive Semiconductor Power Meter for the 3-cm-Wavelength Range – A. N. Komov and Yu. P. Kudryakov 720 156
Ultrahigh-Frequency Radiometer with a Superconducting Detector – I. M. Dmitrenko, N. I. Ivanov, and I. I. Yurchenko 722 158
Automatic Magnetometer – I. M. Batyaev 724 160
Use of a Scanistor for Noncontact Measurement of Instantaneous Linear Velocities – P. I. Gos'kov, Yu. K. Shelkovnikov, and A. G. Yakunin 727 163
Device for Measuring the Distribution of Surface Electric Potential – S. Yu. Sakalauskas and A. T. Dobrovol'skis 730 165
Instrument for Measuring the Nonlinearity of a Volt–Ampere Characteristic Curve – N. I. Segeda, S. L. Chernyuk, and A. N. Shirochenkov 733 168
Power Supply for 1024-Channel Spectrometer with Semiconductor Detector – L. A. Lozovskii, V. V. Solov'ev, and A. S. Khimchenko 735 170
High-Voltage Regulated Power Supply – B. A. Baginskii, V. N. Makarevich, and M. M. Shtein 737 172

GENERAL EXPERIMENTAL TECHNIQUES

On the Duration of Hydrogen Evacuation by Magnetic-Discharge Pumps – N. A. Demidov, E. M. Ezhov, and A. A. Ul'yanov 739 174

High-Speed Vacuum Lock for a Mass Spectrometer – A. A. Sysoev, V. N. Filatov, G. A. Samsonov, and Yu. T. Kalinin 741 176

Absolute Spectral Sensitivity of Photomultipliers in the Photon-Counting Mode – N. B. Aref'ev, M. L. Burshtein, V. T. Zarubailo, V. I. Markov, and A. L. Osherovich. 743 177

Measurement of the Spatial Distribution of the Induction of a Nonsteady Magnetic Field – V. Yu. Dubrovin and A. F. Kivshik. 747 180

Hydrothermal Installation with an Internal Heater for Pressures Up to 10 kbar – P. P. Shamaev, A. P. Grigor'ev, and V. V. Tarasov 749 182

Installation for Investigating Processes Occurring behind a Shock Wave Front on the Basis of Infrared Absorption – I. V. Gerasimov, K. G. Tokhadze, and V. I. Tsybulya 751 184

Magnetooptical Installation with a Digital Pulse-Amplitude Analyzer for Investigating Rapidly Occurring Processes – G. S. Krinchik, V. B. Tsvetkov, and V. P. Zolotarev. . 755 188

Use of Interference Contrast Systems to Investigate Faint Radiation – F. A. Korolev, A. Yu. Klement'eva, and D. G. Bakanov. 758 190

Technical Tolerances in the Fabrication of Oblique Selective Fabry-Perot Etalons – N. A. Afonnikov, L. E. Grin', E. L Kalkutina, V. V. Lebedeva, and A. E. Novik 759 192

Pulsed Light Source of High Brightness Based on a DKSSh-120 Lamp with an Adjustable Slope of the Flat Top of the Pulse – V. S. Smirnov and V. P. Novikov. 762 194

Electronic System for Stabilizing the Difference Frequency of Two Lasers – V. B. Vergunov, M. I. Vol'nov, and D. A. Tyurikov 765 197

Means of Combining the Light of Several Lasers – A. E. Pozdnyakov. 767 198

Synchronization of the Lighting of Pumping Lamps in a Laser with Modulated Quality – M. A. Sungurovskii and R. Z. Besedovskii. 769 200

Use of High-Quality Crystals for X-Ray Spectroscopic Diagnostics of a Laser Plasma – K. Getts, Yu. A. Mikhailov, S. A. Pikuz, G. V. Sklizkov, A. Ya. Faenov, S. I. Fedotov, É. Ferster, and P. Tsaumzail' 771 201

Device for Measuring the Dynamic Range of Image Converters – G. A. Chuiko and A. M. Yakobson. 777 207

Multiwire Gas Counter for Coordinated Measurements in the Vacuum Ultraviolet Region – G. D. Bogomolov, Yu. V. Dubrovskii, and V. D. Peskov. 779 209

Gauges Consisting of Pyroelectric Radiation Receivers – O. V. Elfimov, L. S. Kremenchugskii, and S. K. Sklyarenko. 781 211

Autoionization Microscope – A. F. Bobkov, V. A. Vasil'ev, B. Ya. Kuznetsov, G. M. Kukavadze, A. L. Suvorov, M. I. Tumbakova, and K. P. Shakhov 784 213

Angular Distribution of Intensity and Dose Characteristics of Pulsed X-Ray Tubes with a Thermoemissive Cathode – V. P. Abramov, A. S. Kuleshov, and V. K. Kuleshov. 788 217

Precise Determinations of Lattice Periods by Axial X-Ray Photography – D. M. Freik, I. M. Rarenko, Ya. V. Solonichnyi, N. T. Maslyak, and K. V. Tsidylo 790 218

LABORATORY TECHNIQUES

Porous Vacuum Gas Accumulators – V. M. Lebedev 793 221

Method for Increasing the Accuracy of Pressure Measurement Using an MT-6 Vacuum Gauge in the Range 10^2-10^4 Pa – E. M. Mauskop and A. N. Zavilopulo. 794 222

Recording of Luminescence Spectra of Organic Compounds at the Temperature of Liquid Nitrogen – A. M. Noskov 796 223

Device for Joining Cables of Optical Transmission Lines – V. L Mar'in and V. A. Moiseev. . 797 224

Device for Continuous Elongation of Profiled Crystalline Ingots from a Melt – Sh. M. Gogichaishvili, O. Sh. Gogishvili, and S. P. Lalykin 798 226

Growth of Multicrystals of High-Melting Metals – A. A. Yastrebkov and V. A. Repii 800 228

X-Ray Diffractometer Attachment for Controlling Structural Imperfections in Large Crystals – G. I. Antonenko, A. N. Berletov, and E. I. Raihkel's 802 230

Cryostat for an IKS-21 Spectrometer – A. S. Kinduris 803 231
System of Automatic Replenishment of the Liquid Helium Supply in a Cryostat – É. A. Amelin, V. M. Boichuk, A. F. Bondar', A. P. Vakhmenin, and L. P. Sosnenko.. 805 232
Nonmagnetic Helium Cryostat of Fiberglass – É. A. Amelin, Yu. K. Belan, V. M. Boichuk, V. M. Vasilevskii, and É. A. Moiseenko 809 235
Measurement of the Thickness of Transparent Plates – Yu. N. Popov 811 237
Electronic Weights Using a Digital Indicator – I. K. Sukharev, A. A. Kozhukhov, and G. S. Bondarev 813 239
Laboratory Mixer – S. V. Rykov 815 241
Dismountable Magnetooptical Cryostat with Superconducting Solenoid at 83 kOe – D. M. Gureev, I. I. Zasavitskii, and B. N. Matsonashvili 816 242

NEW INSTRUMENTS
Oscillograph Attachment for Contact-Free Observation of Pulsed Current Signals – V. P. Korotkii, V. P. Mel'nikov, A. A. Muravitskii, and A. M. Semenov 819 245
Chemotron KIN-2 Information Concentrator – E. M. Shmar'yan and A. I. Lepikhov 820 246
IRÉ-1 Mercury Electrochemical Integrator – E. M. Shmar'yan, G. Ya. Voronkov, A. I. Vasil'tsov, and A. I. Lepikhov 821 247
Multichannel Device for Measuring the Statistical Characteristics of Low-Power Diodes and Transistors – É. G. Atamalyan, V. I. Aleksakova, and V. V. Petrenko 822 247
Device for Determining the Thickness of Dielectric and Epitaxial Layers of Semiconductors – V. P. Mushinskii, M. I. Karaman, V. A. Markovskii, and V. V. Pavlov 823 248
ISP-1 Optoelectronic Device for Measuring Speed and Angular Displacements of Magnetic Tape – P. I. Gos'kov, Yu. K. Shelkovnikov, and A. G. Yakunin 824 249
IS-1 Optoelectronic Device for Measuring the Speed of Magnetic Tape – P. I. Gos'kov, Yu. K. Shelkovnikov, and A. G. Yakunin 825 249
IS-2 Optoelectronic Device for Measuring Linear Velocities and Displacements – P. I. Gos'kov, Yu. K. Shelkovnikov, and A. G. Yakunin 826 250
Noiseproof Digital Phase Meter – M. K. Chmykh and P. A. Lopardin 827 251
Multichannel Digital Synchronous Correlometer – A. A. Os'minin, N. G. Zakharov, A. D. Gorbokonenko, A. S. Lushnikov, A. V. Kuz'min, G. N. Abramov, E. I. Kuryshov, and M. A. Tsvetov 828 251
Superhigh-Frequency Hall Transducers – A. N. Komov, L. M. Smirnova, and M. V. Shmalev. 829 252
Diode for Forming Current Pulses with Subnanosecond Fronts – E. V. Bozhkova, L. P. Ivanov, D. D. Karimbaev, G. L. Prikhod'ko, L. K. Tarasova, G. M. Fuks, and S. S. Khludkov 830 253
Installation for Automatic Monitoring of the Geometry of Microstructures – Yu. N. Bienko, E. K. Chekhovich, V. É. Samuilo, Yu. G. Burov, N. S. Sobchuk, V. V. Baranov, and D. V. Tolkun 831 254

Apparatus for the Study of the Scattering of Electrons by Atomic Nuclei in Storage-Ring Experiments – P. L. Baturin, B. A. Lazarenko, D. M. Nikolenko, S. G. Popov, and Yu. G. Ukraintsev 869 38
Drift Chamber with Multiwire Signal Element and with Large Drift Gap – N. I. Bozhko, A. A. Borisov, A. S. Vovenko, V. Yu. Glebov, A. L. Mukhin, V. G. Rybakov, A. N. Sytin, and R. M. Fakhrutdinov 874 42
Loading Characteristics of a Drift Chamber with a Multiwire Signal Element and a 250-mm Drift Gap – N. I. Bozhko, A. A. Borisov, V. Yu. Glebov, and R. M. Fakhrutdinov 878 45
Accuracy of the Spatial Arrangement and Tension of Wire Electrodes in Proportional Chambers – G. D. Alekseev, N. A. Kalinina, V. V. Kruglov, and D. M. Khazins 881 47
Proportional Chamber with Signal-Wire Spacing of 10 mm – G. D. Alekseev, N. A. Kalinina, V. V. Kruglov, and D. M. Khazins 886 51
Filmless Method of Controlling the Memory Time of a Streamer Chamber – V. D. Volodin, N. S. Glagoleva, A. T. Matyushin, V. T. Matyushin, Zh. Zh. Musul'manbekov, and N. N. Nurgozhin 890 54
Automatic Spark Counter for Tracks – V. A. Nikolaev, B. M. Aleksandrov, V. S. Vedeneev, and A. S. Krivokhatskii 893 57
Spectrometric Characteristics of Optical Gas-Discharge Chambers in the Pulsed Proportional Amplification Regime – V. G. Vasil'chenko, N. K. Vishnevskii, A. G. Lavkin, V. G. Lapshin, V. T. Purgin, V. I. Rykalin, and V. K. Semenov 896 60
Analog Meter for the Ratio of the Signals from Position-Sensitive Semiconductor Detectors – Yu. S. Volodyagin, A. A. Korotkii, and V. N. Kudryavtsev 899 62
Connection between Spectrometric and Temporal Characteristics of Semiconductor Detectors for Nuclear Radiation – O. V. Zakharchuk, T. M. Potapova, and O. P. Fedoseeva 903 65
Silicon Detectors for the Spectrometry of Electrons and of Soft X Rays – E. P. Tutov, N. B. Tyurina, R. P. Saprykin, and O. P. Fedoseeva 907 68
Semiconductor n-Si–^{119}Sn Resonant Detector – B. B. Kovacheva, I. L. Tikhov, and Tsv. V. Bonchev 910 70
Construction and Characteristics of a Gas-Filled Electroluminescent Detector for Soft X Rays – D. A. Goganov, N. I. Komyak, V. B. Él'kind, and A. A. Shul'ts 912 72
Hardness Dependence of Thermoluminescent Glass Dosimeters for Photons with Energy up to 6 MeV – A. L. Barinov, L. A. Bochvar, T. L. Gimadova, L. B. Keirim-Markus, Yu. V. Orlov, and M. V. Razumovskii 916 75
Method of Black Absorber in Mössbauer Spectroscopy of ^{119}Sn – V. A. Varnek 921 79
Model of Ultrafast Shutter for Resonant Gamma Rays – A. N. Artem'ev, K. P. Aleshin, V. S. Skiyarevskii, and E. P. Stepanov 924 82

EXPERIMENTAL APPLICATIONS OF COMPUTER ENGINEERING

Coupling of the "Élektronika 70" and "Élektronika T3 16" Small Computers with External Devices – A. B. Chaplygin, M. V. Vedernikov, and A. T. Burkov 927 85
Information Input Unit for the "Iskra-1122" Electronic Keyboard Computer – N. A. Filin and A. V. Trofimov 930 87
Apparatus for Readout of Information in Binary Code for an Electronic Computer to Microfilm – Yu. L. Kravchenko, G. M. Mamontov, A. K. Potashnikov, and V. N. D'yakonov 933 90

Linkage of High-Speed Analog–Digital Converter with the F5033K Number Printer – G. G. Bondarovich, N. A. Sokolova, and V. G. Tsyvinskii 936 93
Block for Parallel Coding of Information from Multiwire Proportional Chambers – N. M. Nikityuk, R. S. Radzhabov, and M. D. Shafranov 938 95
Adaptive Digital Frequency Meter – E. D. Baran and A. A. Chaika 942 98

ELECTRONICS AND RADIO ENGINEERING
Unit for Coupling a 4096-Channel Analog–Digital Converter to the AI-1024 Storage – A. M. Kalashnikov, I. Yu. Petrov, and A. K. Sheremet'ev 946 102
Instrument for the Determination of the Parameters of the Distribution Function in Real Time – A. D. Tishchenko, A. A. Zori, and G. D. Fesivskii 948 103
High-Speed Single-Input System for Pulse Identification – N. I. Shchadin 951 106
Current–Frequency Converter – V. G. Zinov and B. S. Krasnoborodov 954 108
Linear Microcircuit Voltage (Current)–Frequency Converter – V. G. Katrenko and T. A. Ismailov 956 109
Linear dc–ac Voltage Converter – A. S. Gusev and A. V. Shmoilov 958 110
Strobing Peak Voltmeter – V. G. Gol'dort, K. V. Kiryunikov, S. A. Kochubei, and P. L. Chapovskii 960 112
Low-Noise Integrating Converter of Current Pulses into Voltage Pulses – S. P. Golenetskii, V. A. Kireev, V. E. Kostousov, and A. I. Yanter 963 114
Reversible Pulse Counter with Cyclic Code – A. E. Korotynskii and V. V. Gudzevatyi 965 116
Apparatus for Counting and Coding the Number of Pulses – Yu. M. Grashin, V. L. Dvoretskii, and O. A. Tyurikov 967 117
High-Voltage Pulse Generator with Rise Time <10 nsec – V. B. Lebedev and G. A. Pryanikova 969 119
Thyristor Shaper of High-Power Rectangular Nanosecond Pulses – V. P. D'yakonov, S. L. Zienko, and Yu. I. Grushenko 970 120
Parallel Operation of Controlled Discharge Gaps in a Current Pulse Generator – I. I. Kalyatskii, G. S. Korshunov, M. T. Pichugina, V. V. Sedov, and V. V. Khmyrov 973 122
High-Voltage Discharge Gaps Filled with Transformer Oil – N. K. Kapishnikov, V. M. Muratov, and V. Ya. Ushakov 975 124
Remotely Controlled Contacts Carrying Megaampere Currents – G. S. Villeval'd, V. N. Karasyuk, and G. L. Sil'vestrov 980 128
Pulse Generator – E. P. Maksimchuk 983 131
Synchropulse Generator for Video Control Systems – B. A. Polonskii 985 132
Synchronizer with Discretely Regulated Delay – A. N. Kozyr'kov, V. V. Pershakov, and V. S. Romanov 988 134
Pulse Shaper for Diffusion Measurement by the Spin-Echo Method – V. S. Belkin and Yu. G. Kriger 990 136
Transistorized Cascode Pulse Amplifier – A. Ya. Sinitsyn and R. M. Gabitov 993 139
Generator of Hyperbolic Time Function with Pulse-Duration Output – A. I. Ovcharenko 995 140
Synthesizer of Broadband Signals of Complicated Waveform – É. L. Podol'nyi and V. E. Yamnyi 997 142

Volume 21, Number 4, Part 2 July-August, 1978

ELECTRONICS AND RADIO ENGINEERING
High-Speed Two-Channel Generator of a Grid of Quartz-Controlled Frequencies – V. N. V'yukhin, B. V. Vanyushev, and A. L. Chernyshov 1001 145
Differential Quartz Oscillator with a Wide Relative Tuning Range – V. Ya. Bezlyud'ko, A. A. Zelenskii, and V. F. Solodovnik 1004 147
Broadband Frequency Multiplier with Variable Multiplication Factor – P. L. Gluzman and M. P. Morozov 1006 149

Analog Division Circuit with Two Controlled Attenuators with Field-Effect Transistors – Yu. S. Volodyagin and V. N. Kudryavtsev 1008 152
Four-Quadrant Time-Pulse Multiplying Unit Using Integrated Microcircuits – V. V. Pavlov and N. V. Belikov 1011 154
Four-Quadrant Analog Signal Multiplier – V. N. Timonteev, V. P. Kuz'menko, and V. A. Tkachenko 1013 156
Analysis of Linearity of Four-Quadrant Analog Signal Multipliers – V. N. Timonteev, V. P. Kuz'menko, and V. A. Tkachenko 1016 158
Apparatus for the Measurement of the Running Dose and the Mean Value of Infralow-Frequency Signals – A. A. Konovalov, V. I. Turubarov, and S. A. Agapitov 1018 160
Extremator Based on Operational Amplifier with Nonlinear Feedback – Yu. A. Alabuzhev .. 1020 162
Use of Electron-Optical Image Converter for Indicating Single Signals – V. S. Gusel'nikov, V. I. Zhavoronkov, S. I. Zhavoronkov, and P. I. Chilikin 1021 163
Use of Stroboscopic Oscilloscopes for the Investigation of Random Microwave Processes – V. N. Soldatkin and G. M. Vorontsov 1023 165
Use of a Radio Interferometer for the Study of Coherent Transition Radiation in the Microwave Band – M. V. Burtyka, V. D. Eremka, and A. Ya. Kirichenko 1025 167
Decrease of Amplitude Modulation Following Electronic Tuning of a Reflex Klystron – N. N. Prentslau, V. M. Dmitriev, and V. D. Bobryshev 1028 169
Extension of the Nuclear-Magnetic-Resonance Capabilities of the Varian HA-100D Spectrometer – Yu. Yu. Samitov and A. I. Khayarov 1030 171
Shims x, y, xz, yz in the Form of Flat Conductors of Nuclear-Magnetic-Resonance Radiospectrometers of High Resolution – A. A. Lukhvich and V. R. Churilo 1032 173
Follow-Up Rejector Filter for the Power-Line Frequency and Its Harmonics – A. Yu. Shchekotov and A. M. Golyavin 1034 175
Effective System for the Protection of Transistor Stabilizers – M. P. Baskov and G. G. Vorob'ev 1037 178

GENERAL EXPERIMENTAL TECHNIQUES

Plasma Source for Bombardment of Solids by Positive and Negative Ions – G. M. Gurevich, Yu. L. Danilyuk, and A. P. Kovarskii 1041 181
GFÉU-30 Hodoscopic Photomultiplier – V. G. Vasil'chenko, V. G. Lapshin, E. A. Monich, A. I. Ronzhin, and V. I. Rykalin 1043 183
Controlled Photomultiplier for the Measurement of Optical Spectra – K. N. Kasparov and V. N. Staroverova 1048 187
Phase Characteristics of Photomultiplier FÉU-117 Operating in the Radioheterodyne Regime – Yu. Yu. Martyushev and G. D. Petrukhin 1051 190
Universal Instrument for the Investigation of Local and Integral Electron Emission – A. V. Gostev, É. M. Reikhrudel', N. Ya. Rukhlyada, and B. B. Shishkin 1053 192
Photoelectric Method of Determining Fast Variations of the Work Function – S. Sendecki and B. Barwinski 1056 194
High-Aperture Source of Ions with Surface Ionization – V. P. Ivanov, A. I. Rastorguev, A. A. Sysoev, N. I. Tananykin, and P. N. Chistyakov 1058 196
Photoionization Radiation Spectrometer – E. D. Mishchenko, A. M. Abdullaev, T. G. Kazachevskaya, and G. S. Kvater 1059 198
Apparatus for Digital Recording of Mass Spectra – V. P. Ivanov, A. V. Novichkov, A. A. Sysoev, N. I. Tananykin, and G. A. Shershnev 1063 201
Low-Temperature Magnetometer for the Measurement of the Magnetic Moment of Metallic Whisker Single Crystals – V. M. Pudalov and S. G. Semenchinskii 1065 203
Photosensor with Logarithmic Transfer Characteristic – V. P. Snykov and N. D. Tret'yakov 1069 206
Coordinate Gas Counters for the Investigation of Spectra in the Vacuum-Ultraviolet Region – G. D. Bogomolov, Yu. V. Dubrovskii, and V. D. Peskov 1073 210
Pulsed Optical Registration of Sound Fields – Yu. E. Ryzhei, E. I. Kheifets, and E. L. Shenderov 1077 213

Optoelectronic Unit for the Investigation of Pulsed Light Signals – G. A. Aver'yanov, A. S. Voronov, and S. N. Chistyakov 1080 216
Multichannel Correlator for Optical-Mixing Spectroscopy – Yu. F. Kiyachenko and L. K. Yudin 1082 218
Methods of Determining the Plane of Spatial Frequencies to Obtain Filter Holograms – G. V. Kukarov, I. I. Mokhun', and V. I. Protasevich 1085 221
Installation for the Measurement of Scattering and Depolarization of Light by a Liquid – E. Yu. Korableva and F. I. Panachev 1088 223
Stabilized Two-Frequency He+Ne Laser for 0.63-μm Wavelength – A. N. Bondarenko, V. K. Vologdin, and Yu. M. Krinitsyn 1090 225
N_2 Laser with High Average Power and Longitudinal Discharge – Yu. I. Bychkov, M. N. Kostin, V. F. Losev, and V. F. Tarasenko 1093 228
Electroionization CO_2 Laser with Working Pressure 10 atm – V. M. Orlovskii and V. V. Osipov 1094 229
High-Pressure Chamber up to 30 kbar for Neutron-Diffraction Research – V. K. Fedotov, L. F. Bondarchuk, V. P. Zhebelev, and E. G. Ponyatovskii 1096 231
Optical Resonator for Pulsed Dye Laser Pumped by a Powerful Nitrogen Laser – L. M. Beterov, A. A. Chernenko, and A. V. Shishaev 1099 234
Installation for the Investigation of Nonequilibrium Parameters of Semiconducting Structures – A. S. Maksimov, V. V. Kovtun, and V. P. Sinilo 1101 236
Installation for Plotting Voltamperometric Characteristics of Magnetodiodes – L. A. Karapatnitskii and A. D. Sartbaev 1104 238
Electrolytic Cell for the Investigation of Optical Properties of Semiconductors – V. V. Gerasimenko, A. I. Ivashchenko, L. P. Molodyan, and A. I. Solomonov 1107 241
Double Phototransistor Sensitive to the Coordinate of a Light Spot – G. A. Stepanova and R. Kh. Zakirov 1108 242
Sharp-Focus Pulsed X-Ray Tube with Plasma Electron Sources – F. P. Demidov and A. M. Chestnov 1111 245
Connection between the Spatial Frequency Distortions and the Resolution of a Raster Electron Microscope Operating in the Secondary-Electron-Emission Regime – V. P. Golubev, B. N. Vasichev, and O. A. Buklova 1113 247
Attachment of a Quadrupole Mass Spectrometer to the ÉG-100A Electronograph – J. Tremmel, S. Bohatka, I. Berec, and I. Hartittai 1118 251

LABORATORY TECHNIQUES

Setup for the Evaporation and Spectroscopic Investigation of Films in Vacuum – G. A. Muranova, A. F. Perveev, Yu. D. Pushkin, and V. M. Zolotarev 1121 253
Small Helium Condensation Pump to Pump off a Supersonic Gas Jet – V. P. Strel'nikov and V. D. Telepnev 1122 254
High-Speed Vacuum Seals – N. G. Gerasimova 1124 256
Connection Circuit of Gas-Discharge Linear Indicator – N. P. Zakharov 1126 257
Cooling of Photoreceivers – V. A. Safonov and L. G. Vainer 1128 259
Temperature Block for a Neutron Diffractometer – Z. L. Akhmedzhanov, A. A. Loshmanov, D. F. Litvin, and I. I. Yamzin 1129 260
Cell for the Investigation of Infrared Spectra – S. L. Tatarinov, V. M. Bulanov, and A. G. Finkel' 1131 262
Thermostatically Controlled Resonant Cell for the Investigation of Nuclear Magnetic Resonance – E. Yu. Medvedev and V. P. Suetin 1132 263
Thermal Regulator that Changes the Temperature of an Object according to a Specified Program – A. M. Emel'yanov 1134 265
Cell for the Measurement of Electromechanical Properties of Solid Dielectrics – M. P. Tonkonogov, V. A. Mironov, V. L. Bulakh, and L. L. Ligai 1136 267
Low-Temperature Resistive Pickups Based on Single-Crystal Layers of a Ge+Si Solution on a Ceramic – R. Sh. Ibragimov, S. P. Logvinenko, and A. A. Velichko 1138 268

Capacitive Level Meter – V. P. Peshkov and A. N. Vetchinkin 1140 270
Broadband Time Relay – E. N. Fedorchuk, V. N. Kulitskii, and É. L. Lychkovskii 1142 272

NEW INSTRUMENTS

Apparatus for Coupling a Digital Voltmeter and Perforator to an Automatic System for the Compilation and Registration of Experimental Data – A. L. Aleksandrov, L. B. Gulyaev, A. G. Zhdan, A. Ya. Oleinikov, and L. Z. Pososhenko 1144 274
Electrooptical Meter for the Rotation Angles of an Object – M. V. Khashchina, Yu. K. Pustovar, M. D. Bunyaev, Yu. P. Novikov, V. S. Raff, and L. V. Romanov 1145 275
Digital Instrument for the Measurement of Linear Dimensions – Yu. G. Dolganev, V. N. Kulagin, N. N. Medvedev, and T. V. Plonskaya 1145 275
Installation for the Measurement of the Adhesion of Thin Films – V. A. Labunov, L. N. Leshchenko, and A. R. Uvarov 1146 276
Cryogenic Sorption Trap – V. Ya. Chernyshenko, A. F. Sementsov, and S. F. Grishin 1147 276
Hydraulic Pump Adjustable to 1500 bar (NGR-1500) – D. S. Mirinskii and Ya. I. Shurin 1148 277
Gas Generator – V. A. Gruzdev, A. F. Zlobina, and Yu. E. Kreindel' 1148 277
Apparatus for the Investigation of the Creep of Refractory Materials in Vacuum and in Rarefied Gas Flows – É. A. Abramyan, L. I. Ivanov, E. E. Kazilin, and V. A. Polyakov 1149 278
Superconducting Solenoids – G. G. Svalov, L. P. Radchenko, and L. N. Slonimskaya 1150 279
Cryostat Thermostat for Electronic Devices – A. G. Demishev and É. A. Medvedskaya 1151 280
Cryogenic System with Adjustable Temperature – A. G. Demishev, D. S. Ratmanskii, A. K. Shirkov, and D. P. Pelykh 1152 281
Cryostat for Operation with an Adjustable Helium Level – A. G. Demishev and N. P. Nazarenko 1153 282
Cryostat for Optical Investigations – N. E. Unesikhin, N. A. Pishvanova, and V. V. Shaparenko 1154 283
Module for the Control of the F-30 Digital Avometer in the CAMAC Standard – S. V. Lukoshkov and V. N. Strel'nikov 1155 284
Module for the Control of the Stepping Motor in the CAMAC Standard – S. V. Lukoshkov, V. N. Strel'nikov, and A. B. Furshchik 1156 285
Integrating Recorder of a Slowly Varying Voltage – L. L. Plyusnin, L. Ya. Shapiro, and A. P. Cherepanov 1157 286
UPI-1 Measuring Amplifier–Converter – B. G. Ignatov, A. L. Aleksandrov, V. A. Kuznetsov, and L. Z. Pososhenko 1158 287

Volume 21, Number 5, Part 1 September-October, 1978

Apparatus for the Investigation of Positron Annihilation (Review) – V. F. Andreeva, A. V. Dolenko, V. G. Egiazarov, and L. A. Zemlerub 1159 7

NUCLEAR EXPERIMENTAL TECHNIQUES

New System of Coupling the Frequency of the Accelerating Voltage with the Magnetic Field in the Synchrophasotron at the Joint Institute of Nuclear Physics – A. I. Mikhailov, G. P. Puchkov, and A. P. Tsarenkov 1174 21
High-Precision Ion Accelerator – G. I. Primenko, V. I. Strizhak, Yu. I. Usikov, and I. V. Éstulin 1178 25
ING-2 Pulsed Neutron Generator – V. P. Yakushev and V. I. Burlaka 1181 27
Small Tube for Electron Acceleration to 500 keV with Pulse Duration 2 nsec – N. G. Pavlovskaya, S. I. Él'yash, N. A. Dron', and G. N. Sloeva 1183 29
High-Voltage Pulsed Modulator of Strong-Current Electron Accelerator – O. A. Gusev, V. B. Markov, E. M. Mellekh, A. S. Perlin, O. P. Pecherskii, M. Yu. Polyanskii, and G. A. Spitsyn 1186 32

Operation of Strong-Current Electron Gun for the Microsecond Range — V. S. Pak, Yu. P. Usov, N. I. Tsvetkov, and A. A. Shatanov 1189 34
Charge-Exchange Sodium Target with Large Aperture — B. A. D'yachkov, V. I. Zinenko, M. A. Pavlii, and V. Yu. Petrusha 1191 37
Installation for the Investigation of Gas Luminescence Excited by the Products of Neutron Nuclear Reactions — I. P. Gur'ev, A. B. Dmitriev, V. S. Il'yashenko, A. I. Mis'kevich, and B. S. Salamakha 1194 39
Si(Li) Electron Spectrometer with Superconducting Transporting Magnets — Z. Maté, I. Mahunka, D. Morik, D. Novak, F. Tarkani, T. Fenyes, and K. Fyule 1197 41
Determination of the Thickness of the Sensitive Layer of Semiconductor Detectors with the Aid of Beta and Gamma Sources — A. A. Aleksandrov, I. V. Kirsanova, V. K. Lyapidevskii, and O. P. Fedoseeva 1201 45
Detectors Sensitive to the Point of Incidence and Produced by the Ion-Implantation Method — V. G. Vinogradova, N. V. Eremin, and I. V. Kozei 1203 47
Two-Coordinate 1.6× 0.8 mm Drift Chamber — G. D. Alekseev, V. I. Ganichev, V. V. Karpukhin, V. V. Kruglov, V. P. Pugachevich, and D. M. Khazins 1206 50
Installation SKM-200 with Two-Meter Streamer Chamber in a Magnetic Field — A. U. Abdurakhimov, M. Kh. Anikina, A. M. Baldin, S. G. Basiladze, G. L. Vardenga, V. D. Volodin, N. S. Glagoleva, A. I. Golokhvastov, A. G. Grachev, E. A. Dement'ev, V. G. Ivanov, M. S. Zhuravleva, N. I. Kaminskii, P. S. Kuznetsov, Yu. Lukstin'sh, P. K. Man'yakov, E. A. Matyushevskii, A. T. Matyushin, V. T. Matyushin, M. G. Meshcheryakov, Zh. Zh. Musul'manbekov, N. N. Nurgozhin, É. O. Okonov, G. I. Oleinik, V. A. Stepanenko, Kh. Khmelevski, S. A. Khorozov, Yu. A. Cherepanov, and É. A. Shevchenko 1210 53
Investigation of the Integrated Brightness of Tracks in a Streamer Chamber with the Aid of a Photomultiplier — C.-P. Glasneck, Ya. V. Grishkevich, Z. V. Krumshtein, D. Pose, V. M. Suvorov, and J. Schuler 1216 58
Operation of Proportional Counters at Pressures up to 100 atm — V. G. Grebinnik, V. Kh. Dodokhov, V. A. Zhukov, A. B. Lazarev, A. A. Nozdrin, A. F. Pisarev, V. A. Stolupin, and V. I. Travkin 1220 62
High-Pressure Proportional Counter at Low Temperatures — V. G. Grebennik, V. Kh. Dodokhov, V. A. Zhukov, A. B. Lazarev, A. A. Nozdrin, V. A. Stolupin, and V. I. Travkin 1225 66
Dependence of the Growth Time of a Scintillation Pulse in CsI Crystals on the Concentration of the Activator and on the Ionization Density — V. K. Lyapidevskii and V. P. Prorvich 1228 69
Use of Low-Efficiency Counter for the Measurement of the Average Number of Charged Particles — A. S. Belousov, Y. A. Vazdik, E. I. Malinovskii, S. V. Rusakov, Yu. V. Solov'ev, and P. N. Shareiko 1230 71
Detector for High-Intensity Neutron Fluxes Based on Gas Scintillators with Selective Level Population — E. M. Gorodkov, A. B. Dmitriev, V. S. Il'yashenko, A. I. Kirillov, A. I. Mis'kevich, B. S. Salamakha, V. A. Solov'ev, and M. G. Shirokov 1234 74
Registration of Intense Fluxes with the Aid of Quartz Resonators — A. A. Greshilov, A. D. Lipunov, and V. V. Pokrovskii 1236 75
Simultaneous Measurement of the Activity of ^{37}Ar and ^{39}Ar — A. V. Fisenko 1240 79

EXPERIMENTAL APPLICATIONS OF COMPUTER ENGINEERING

Organization of a System for Continuous Input of Experimental Data on Rapid Processes into the BÉSM-4M Computer — Yu. N. Raspopov, I. S. Shevchenko, and Yu. T. Neporozhnii 1243 82
Installation for the Input of Experimental Information in the "Mir-2" Computer — V. A. Alekseev, N. I. Kalyadin, and É. L. Chubashov 1247 85

Use of "Nairi-K" in Multichannel Installation for Activation Measurements — V. I. Boldisov, O. A. Dubrovskii, V. P. Koroleva, N. P. Kurakov, and L. A. Chernov 1249 87
Electronic Apparatus for the Expanded Diagnostic System of the Beam of the Liquid Hydrogen Chamber "Lyudmila" — S. G. Basiladze, N. F. Bulanov, Ngugen Viet Zung, and V. K. Yudin 1252 90
Program Blocks of the SUMMA System of Unified Multichannel Analysis Modules — V. G. Rybakov 1257 94
Preliminary Apparatus Analysis of Random Processes — A. V. Blokhin 1259 95
Binary–Decimal Adder–Subtractors — V. V. Blatov and A. A. Chudov 1260 96
Binary to Binary–Decimal Code Converter — Ya. V. Buchinskii, S. A. Piskun, and A. A. Stolyarov 1264 100

ELECTRONICS AND RADIO ENGINEERING
Use of AI-4096 Analyzer and TsAP-723/1 Digital–Analog Converter in a Photoelectronic Spectrometer and in a Coincidence Instrument — Yu. L. Sergeev, A. V. Golovin, and S. I. Lozovoi 1267 102
Decade Counter for up to 200 MHz — V. V. Blatov and N. M. Shernyaev 1269 103
Digital Decade Pulse Counter with Long-Time Memory — A. M. Izmailov, G. S. Ter-Israelov, and G. P. Kazarova 1272 106
Functional Voltage-to-Frequency Converter — I. M. Abdullaev and R. M. Akhmedov 1274 108
Voltage–Current Converter — O. P. Novikov 1277 111
Large Hybrid Integrated Circuit "Dual Registration Channel for Proportional Counters" — Yu. A. Afanas'ev, S. G. Basiladze, M. V. Gusak, S. M. Korenchenko, and M. I. Markus 1278 112
High-Power Generator of Millisecond Rectangular Current Pulses — I. I. Kravtsevich, I. G. Nekrashevich, and A. V. Smirnov 1282 115
Generator of Pulses for Magnetron Modulation in the Centimeter Band — A. V. Barmin, I. G. Kataev, and I. I. Rozhkov 1284 117
Spiral Generator of High-Voltage Pulses — G. V. Naimark and A. A. Perunov 1286 119
High-Voltage Pulsed Generator with Protecting Solenoid — V. D. Volodin, N. S. Glagoleva, N. I. Kaminskii, A. T. Matyushin, and V. T. Matyushin 1289 121
High-Speed High-Power Pulsed Gas Discharger — L. K. Lytkin, A. F. Pisarev, V. F. Pisarev, and G. S. Revenko 1291 123
High-Speed Switching System of High-Voltage Pulse Generator — I. R. Pekar' 1293 125
Use of Saturable Reactors to Switch High Energies — N. P. Polyakov, P. P. Rumyantsev, V. V. Sinenko, and Yu. P. Yarushkin 1297 129
Suppression of Oscillations when Powerful Nanosecond Pulses Are Shaped by Avalanche Transistors — V. P. D'yakonov 1299 131
Simple Shaper of Nanosecond Pulses — A. Z. Venger, A. N. Ermak, and A. M. Yakimienko 1303 134
Shaper for Time Tie-In — Yu. V. Sten'kin and V. I. Stepanov 1304 135

Volume 21, Number 5, Part 2 September-October, 1978

ELECTRONICS AND RADIO ENGINEERING
Simple Linear Transmission Gate — Yu. V. Sten'kin and V. I. Stepanov 1309 138
Digital Sweep Generator with Nonlinearity Correction — I. I. Zadubovskii 1311 139
Simple Shaper for a Series of Fast Scans — G. I. Aponin and A. A. Besshaposhnikov 1313 142
Electric-Oscillation Generator Stabilized by a Mechanical Sapphire Resonator at a Temperature 4.2°K — A. D. Kochubei and V. D. Mitrofanov 1316 144
Semiconductor for the 3-cm Band with Electric Frequency Tuning — V. M. Pudalov 1318 146
Broadband Current Amplifier for Inductive Loads — M. G. Tokhmakhyan 1320 149

Apparatus for Recording Topograms of the Oscillations of a Resonant Body – V. L. Temerov 1323 151
Apparatus for the Measurement of Electron Field-Emission Noise – R. Z. Bakhtizin and S. S. Gots 1327 155
Analog Meter for the Temporal Parameters for Random Pulsed Fluxes – P. P. Drabich, Ya. V. Medvid', and R. F. Fedoriv 1330 158
Strobe-Pulse Peak Detector – R. A. Kamiliya and G. A. Mailov 1333 160
Precision High-Speed Synchronous Detector – O. L. Nikolaichuk 1335 162
Inverting Devices – A. M. Kovalev and Yu. I. Puchkov 1337 165
Amplitude and Balance Modulator without a Resonant Circuit – I. A. Belozerov 1340 167
RC Band Filter with Direct Coupling of the Elements – M. E. Gurchik 1342 169
Controllable Digital Phase Shifter – V. S. Batrachenko and T. V. Zarubina 1344 171
Digital Phase Shifter for a Precision Calibrator of Phase Shifts – N. V. Maslov and R. P. Prikhnenko 1346 172
Digital Asynchronous System for Phase Control with a Thyristor Converter – N. I. L'yanova and A. A. Tunkin 1348 174
Attachment for an Oscilloscope Used to Investigate Digital Circuits – V. A. Suchkov 1351 177
Device that Increases the Accuracy of Laser Supply Sources – S. I. Kutsarov and S. I. Mitev 1352 178
Reversible Transistor Converter for Controlling dc Motor – A. P. Leonov, V. V. Popov, and E. A. Ustinov 1354 180
Universal Power Supply for Photoelectron Multiplier – V. A. Zazulin and V. I. Zametin 1358 183

GENERAL EXPERIMENTAL TECHNIQUES

Ion Projector – D. A. Noskov and N. G. Pankovets 1361 185
Glued Water-Cooled Windings – Yu. K. Katrukhin, N. G. Kocharov, B. P. Khrustalev, C. É. Bazan, and K. A. Trojnar 1363 187
Magnetic Pickup for the Measurement of Spontaneous Magnetic Fields near a Laser Plasma – V. V. Korobkin and S. L. Motylev 1366 189
Apparatus for Optical Measurements under Conditions of Hydrostatic Pressure Up to 2 kbar at Temperatures $\lesssim 25°K$ – I. I. Zasavitskii 1368 191
Use of Halogen Tungsten Lamp as a Radiation Source for the Investigation of the Spectral Characteristics of Weakly Reflecting Materials – I. Averkov and A. A. Emel'yanov.. 1371 194
Optical Radiation Receiver for a Phase-Measuring System – V. A. Druchevskii, V. V. Zubkov, A. A. Krasnov, N. V. Malysheva, I. N. Matveev, B. V. Poletaev, and N. D. Ustinov 1373 196
Photoelectric Converter – V. I. Moshkin, Yu. V. Olenin, and O. G. Panchuk 1376 198
System for Protecting Photomultipliers against Optical Overloads – B. G. Kozlov and V. N. Angarov 1378 200
Automatic Rotary Diaphragm for Microphotometer – V. K. Budilov, V. T. Volkov, Yu. A. Kuznetsov, and V. P. Sidorkin 1380 202
Compact Single-Mode CO_2 Laser – V. S. Burmasov 1383 205
System for Stabilizing the Emission Frequency of a High-Power Laser against a Reference Laser – O. A. Kolosovskii, N. A. Semenovskaya, V. S. Tkachenko, N. S. Fertik, and A. V. Chuprakov 1384 206
Controllable Phototropic Shutter with Increased Accuracy of Synchronization of Single-Pulse Ruby Laser – V. G. Balenko, V. Z. Kagna, and V. M. Podgaetskii 1386 208
Apparatus to Increase the Efficiency of a Saturating Absorber in Generation of Ultrashort Light Pulses – A. S. Kuch'yanov and V. D. Ugozhaev 1388 209
Pulsed Imitators of Laser Radiation – N. A. Konstantinov, O. A. Mednikov, T. A. Fratini, and L. A. Khomutova 1390 211
Visualizer for Infrared Laser Emission Field – G. I. Aponin, A. A. Besshaposhnikov, and A. I. Zakharchenko 1392 213
X-Ray Interferometer Based on Small-Angle Scattering Apparatus – T. D. Sotnikova and L. A. Smirnov 1394 215

Apparatus for Multiple-Element X-Ray Fluorescence Analysis Using a Semiconductor Detector and an X-Ray Tube – A. V. Andreev and A. K. Cheburkin 1396 217
Sensitivity of Films when Used in High-Voltage Electron Microscopy – M. M. Kantor, V. N. Kolotinskii, I. I. Novikov, and V. N. Timofeev 1399 219
Determination of the Positions of the Maxima of Distorted Profiles of Diffraction Lines – Yu. F. Titovets 1401 222
Quantitative Registration of Electric and Magnetic Microfields in a Raster Electron Microscope – É. I. Rau, G. V. Spivak and N. M. Karelin 1404 224
Probing of Electric Fields by Electron Reflection – O. V. Andreev, O. B. Evdokimov, and B. A. Kononov 1407 227
Approximation of Thermometric Characteristics of Thermodiodes of n- and p-GaAs in the Interval 4.2-300°K and of p-GaAs Resistance Thermometers in the Interval 4.2-100°K – S. P. Logvinenko and S. L. Derbysheva 1409 229

LABORATORY TECHNIQUES
Amplifier for SF-4 and SF-4A Spectrophotometers – L. A. Al'bota 1414 233
Some Features of the Operation of Photelectron Multipliers when Used to Register Laser Radiation – V. M. Yasinskii 1415 234
Apparatus to Rid the Plasma of a Vacuum Arc of Macroparticles – I. I. Aksenov, V. A. Belous, V. G. Padalka, and V. M. Khoroshikh 1416 236
"Shooting" Probe for the Measurement of Plasma Parameters – A. M. Zimin, V. I. Lisitsin, A. Yu. Pavlov, and V. I. Khvesyuk 1419 238
Double Vacuum Seal for Rotary Motion – V. F. Roi 1421 240
Vacuum Pressure Seal with Mechanical Drive of Titanium Nickelide – E. F. Yamshchkov. . . 1422 241
Sparking Leak Detector – Yu. A. Silin'sh 1424 242
Differential Membrane Manometer for the Measurement of Low Pressures – G. S. Abilov, S. P. Polunin, D. N. Astrov, and L. V. Belyanskii 1425 243
Mercury Manometer with Fixed Level in One of the Arms – V. S. Akatov and V. F. Kukarin . 1427 246
Piezoelectric Converter for the Measurement of Large Variable Pressures – N. N. Baulin, N. N. Pilyugin, G. N. Suntsov, and S. Yu. Chernyavskii 1429 247
Piezoelectric Pickup for the Measurement of Pulsed Pressures – L. G. Gvozdeva and Yu. V. Zhilin 1431 249
High-Temperature Cell and Heating Block for Spectrophotometric Research on Solutions in the Ultraviolet and Visible Parts of the Spectrum – G. R. Kolonin and V. N. Kolevatov 1433 251
Determination of the Sensitivity Threshold of Thermal-Action Luminescent Screens Acted Upon by Continuous Infrared Radiation – L. M. Zaitsev, L. Yu. Zysina, M. V. Senashenko, and E. L. Tsarapaeva 1435 253
Contactless Method of Measuring the Temperature and Absorbed Energy in Microwave Irradiation of Biological Specimens – N. V. Mitrofanova, Yu. P. Timofeev, S. A. Fridman, and V. M. Shtemler 1437 254
Supply of Liquid Nitrogen to Cooled Installations – V. A. Ryzhkov and A. Yu. Pal'chevskii ... 1439 256

NEW INSTRUMENTS
Broadband Time-Interval Meter – V. A. Afanas'ev, V. V. Danilevich, S. K. Tovmasyan, A. F. Chernyavskii, and V. A. Chudovskii 1441 258
Angle-Code Converter – V. P. Blinov, Ya. V. Buchinskii, Z. I. Dombrovskii, S. A. Piskun, A. A. Stolyarov, and B. I. Yavorskii 1442 259
DKhP-2 Rheological Spectrophasemeter – L. P. Ul'yanov, V. M. Neimark, and Yu. G. Yanovskii 1443 260
Long-Life Small Helium-Neon Laser – Z. P. Guga, B. M. Kalagurskii, Ya. D. Saichuk, and A. I. Senyukov 1444 261
Portable Gas Radiometer – V. A. Dem'yanov, V. M. Shcherbakov, and A. M. Épshtein. 1444 261
Automated Installation for the Measurement of the Temperature Dependence of the Electric Conductivity, of the Hall Coefficient, and of the Magnetoresistance of Semiconductors – G. L. Lyakhu, G. S. Korotchenkov, and I. P. Molodyan 1445 262

Automated Apparatus for the Investigation of Magnetic Materials – A. L. Kushnir, N. A. Marchenkov, V. V. Timoshenkov, Kh. N. Gainanov, O. I. Shiryaeva, and V. N. Yakovlev 1446 263
Ion-Beam Apparatus for Semiconductor Doping – V. A. Ilyushkin, M. B. Kotlyarevskii, O. S. Ludzish, D. A. Noskov, Yu. A. Shibaev, and Yu. V. Shvetsov 1447 264
Three-Stage Microminiature Cooler – L. I. Anatychuk, A. P. Mel'nik, and D. D. Nikirsa. 1448 265
Universal Digital Meter for Low Temperatures – V. D. Tsidelko, Yu. V. Khokhlov, Yu. G. Tumanov, and N. N. Baryshevskii. 1448 265
Broadband Digital Oscilloscope – V. M. Aul'chenko, Yu. V. Korshunov, V. D. Kutovenko, G. G. Melekhov, and Yu. V. Usov 1449 266
Apparatus for Remote Imput of Alphanumeric Information and a Trainer for Its Operators – B. A. Solomin, K. I. Vershinin, A. A. Kapitonov, M. G. Kashin, A. V. Rudakov, A. V. Tokmakov, and Yu. A. Kolychev. 1451 267
IPTK-50 dc Ammeter for up to 50 kA – É. A. Meerovich, L. I. Andreevskaya, and O. D. Sharipov 1452 268
Superconducting Solenoids with Various Cooling Methods – B. V. Glasov, O. S. Drui, V. I. Kurnosov, V. G. Kotenko, E. I. Skibenko, P. A. Astakhov, L. I. Golubenkova, E. I. Chibisova, and V. B. Yuferov. 1453 269
Measurement Aggregate for the Analysis of the Statistical Characteristics of the Propagation of Optical Signals in the Atmosphere – M. I. Demchuk, V. P. Kuznetsov, and K. P. Utochkin 1454 270
OD-10G Instrument for the Determination of Planarity of a Surface – V. V. Maslov N. P. Novikov, G. K. Terekhova, V. F. Gerasimov, and A. A. Ketkovich 1455 271

Volume 21, Number 6, Part 1 November-December, 1978

Generation of Powerful Subnanosecond Pulses (Review) – G. A. Mesyats and V. G. Shpak 1457 5

NUCLEAR EXPERIMENTAL TECHNIQUES

Pulsed Neutron Generator with Laser Deuteron Source – D. F. Bespalov, Yu. A. Bykovskii, I. I. Vergun, K. I. Kozlovskii, Yu. P. Kozyrev, R. P. Pleshakova, E. V. Ryabov, Yu. V. Cherkasov, A. S. Tsybin, and A. E. Shikanov 1472 19
Cryogenic Phase Selector of Electrons Using a Rectangular H_{101} Resonator – S. V. Blazhevich, É. S. Zlunitsyn, A. I. Zykov, V. A. Kushnir, V. V. Chernyshov, and V. N. Plisko 1475 21
Characteristics of a Total-Absorption Cerenkov Spectrometer Investigated with Gamma-Quantum, Electron, and Positron Beams – G. N. Dudkin, B. N. Kalinin, and G. A. Saruev 1478 23
Pulse-Shaping Circuit for Low-Background Scintillation Beta Spectrometer with Compound Detector – É. G. Tertyshnik 1480 25
Quasi-Isotropic Proportional Chamber – É. S. Belyakov, E. I. Kurgin, V. N. Prokhorov, and K. K. Prokhorova 1483 27
Multiwire Proportional Chamber with Anode Wire Winding Pitch 1 mm – V. M. Golovatyuk, Yu. V. Zanevskii, and V. D. Peshekhonov 1486 30
Calibration of the Threshold of a Neutron Scintillation Counter – V. I. Noga, Yu. N. Ranyuk, and Yu. N. Telegin 1489 32
Downward Drift of Readings of IKS Dosimeters Stored after Irradiation – I. A. Bochvar, T. I. Gimadova, and N. N. Keirim-Markus 1491 34

EXPERIMENTAL APPLICATIONS OF COMPUTER ENGINEERING

Interface between the Display Unit and the Program for Operative Reduction of Spectra with an M-6000 Computer – N. M. Artamonova, N. K. Lastochkin, O. N. Pokrovskii, and A. V. Tyurin 1494 37

Integrated-Circuit Dynamic Memory – R. I. Abbasov, E. M. Alekskerov, D. M. Alimardanov, M. A. Garibov, N. L. Guseinov, A. G. Dzhafarov, Sh. U. Mamedkhalilov, and A. D. Nuriev. 1498 40
Semiconductor Dynamic Main Memory in the CAMAC Standard – Ya. M. Damatov, N. M. Nikityuk, and V. N. Semenov. 1499 41
Sixteen-Channel Time-Digital Converter in CAMAC Standard – S. G. Basiladze and Li Van Sun. 1504 45
Logarithmic Converter of Binary Numbers – A. N. Volgin, A. V. Vygovskii, and V. A. Domin. 1507 48
Transfer of Information from AI-1024 Storage to PL-80 Perforator – N. P. Barabanov and B. P. Sabanin. 1510 51
Transfer of Information from an AI-4096 Analyzer to Digital Indicators and Curve Plotter – Yu. G. Zdesenko, A. K. Cheburkin, and V. N. Kuts. 1513 53

ELECTRONICS AND RADIO ENGINEERING

Digital Separator of Pile-Ups of Time Intervals – S. G. Basiladze and Nguen Kuang Min' . . 1518 59
Reference-Signal Block for the Measurement of Short Time Intervals between Periodic Pulsed Processes – S. F. Pavlov and S. P. Smirnov 1521 62
Two-Channel Broadband Spectrum Analyzer – O. E. Marykivskii, D. G. Levchenko, and A. N. Bagimov. 1523 64
Broadband Automatic Digital Correlator – R. M. Gazdiev, I. E. Kofanov, A. N. Mos'kin and V. I. Pelipets. 1526 66
Active Resistive–Capacitive Filters for Information and Measurement Systems – I. S. Ledovskoi, A. A. Chalyi, and V. L. Knysh 1529 69
Digital Dissector Scanning Generator – Yu. V. Martyshevskii 1532 72
Broadband Stable Univibrator – V. G. Brovchenko, V. M. Nazarenko, and V. A. Tsvetkov. 1534 74
Generator of Pulsed Currents to Supply an Electric Shock Tube – V. A. Zhovtyanskii and Yu. N. Levchenko 1537 76
Multichannel System for the Control of High Voltages – G. M. Spirov and A. A. Cherkasov. 1541 79
High-Power Water-Filled High-Voltage Shaping Line with Damping of the Hydraulic Surge – B. A. Demidov, Yu. M. Krasnikov, I. V. Naumov, and S. D. Fanchenko 1544 83
Voltage-Pulse Limiter – V. M. Nazarenko and V. A. Tsvetkov 1546 84
Pulse-Width Discriminator – Yu. G. Budyashov, V. M. Grebenyuk, and V. G. Zinov. 1547 85
Apparatus for the Measurement of the Frequency Ratio of Two Pulse Sequences – V. S. Sukhotin and P. V. Mironov. 1551 88
Integrating Converter of Voltage into a Pulse-Width Modulation Signal without Precision Gates – É. K. Shakhov 1553 90
Amplifier–Generator for Nuclear Acoustic Resonance Spectrometer – I. I. Sadykov. 1555 92
Power Amplifier with Pulse-Width Modulation – E. I. Zagorodnikov and A. S. Medvedko. 1558 94
Integrated-Circuit Amplifier–Limiter of a Broadband Phase Meter – R. N. Sibgatulin, N. P. Sukhostavtsev, and M. K. Chmykh 1560 96
Integrated-Microcircuit Phase Detector – I. A. Morozov. 1562 98
Spectrometer for Nuclear Magnetic Resonance in Internal Fields of Ferromagnets for the Frequency Range 10-230 MHz – A. N. Babenko 1563 99
Spectrometer for the Investigation of Acoustic Paramagnetic Resonance by Bragg Diffraction of Light – L. I. Strelets and V. V. Samartsev 1567 102
Determination of the Parameters of Anisotropic Dielectrics on the Basis of Resonance of a Waveguide–Dielectric System – Yu. G. Makeev, V. A. Korobkin, N. I. Pyatak, and N. M. Piven' 1569 104

Volume 21, Number 6, Part 2 November-December, 1978

ELECTRONICS AND RADIO ENGINEERING

Use of Low-Inertia Semiconductor Structures to Modulate Radiation in a Submillimeter Laser Interferometer – D. I. Bilenko, É. A. Zharkova, E. I. Khasina, and D. N. Yundeev 1575 107

Economical Control Circuit for Light-Emitting Diode Indicator – A. A. Sviyazov 1578 109

Small High-Voltage Stabilizer for the Supply of X-Ray Detectors – S. M. Mikhailov 1580 111

GENERAL EXPERIMENTAL TECHNIQUES

Magnetic-Discharge Open-Type Manometer with Inhomogeneous Magnetic Field – V. N. Pakulin 1582 113

Three-Dimensional Quadrupole Mass Spectrometer with Elliptical Electrodes – É. P. Sheretov, V. F. Samodurov, B. I. Kolotilin, N. K. Tuzhilkin, and N. V. Veselkin 1584 115

VÉU-6 Electron Multiplier Fed with High-Frequency Pulses – L. G. Karpov and Yu. L. Sergeev 1587 117

Optimization of the Signal/Noise Ratio and of the Stability of Single-Electron Photomultipliers – S. S. Betokhin, I. R. Gulakov, and Yu. V. Pisiyak 1589 119

Laser Installation for the Investigation of Phototransformations of Substances in a Nanosecond Time Interval – S. G. Kuz'min 1592 121

Electrooptical System for Shaping Laser Pulses with Maximum Emission Contrast – M. P. Kalashnikov, Yu. A. Mikhailov, G. V. Sklizkov, S. I. Fedotov, and A. N. Fedorov 1594 124

Meter for the Frequency Characteristics of Photoreceivers, Based on a Two-Mode Gas Laser with Continuous Adjustment of the Intermode Distance – S. A. Gonchukov, V. N. Petrovskii, and E. D. Protsenko 1598 128

High-Speed Method of Recording the Divergence Angle of a CO_2 Laser – V. P. Andronov, L. M. Ivanenko, and O. V. Klopunov 1600 130

CO_2 Laser High-Voltage Power Supply Based on a Pulsed Autotransformer – V. V. Apollonov, A. I. Barchukov, S. I. Derzhavin, I. G. Kononov, K. N. Firsov, Yu. A. Shakir, V. A. Yamshchikov, A. V. Krivonosenko, S. S. Pel'tsman, and B. V. Semkin 1602 131

Influence of Polarization Properties of Spectral Apparatus on the Results of Spectral Measurements – N. R. Senatorova 1605 134

High-Speed Scanning Polarimeter – G. L. Utkin 1607 136

Synchronization of Optical Discharge Image with Its Electrical Parameters – V. K. Bocharov, E. A. Sukhomlin, and V. A. Kravchenko 1610 138

Production of a Strong Magnetic Field in a Small Volume with the Aid of Superconducting Solenoids – V. V. Permyakov, I. G. Gavrish, and N. V. Taryanik 1612 140

Shaping of a Flat-Top Magnetic-Field Pulse – M. M. Karpenko and V. V. Khrustalev 1614 141

Multichannel Magnetometer Using Galvanomagneto-Recombination Converters – M. A. Voevodin, L. P. Zinov'ev, A. D. Kovalenko, N. A. Korukov, Yu. I. Romanov, Sh. Z. Saifulin, and Yu. I. Tikhomirov 1615 143

Measurement of the Angle of Inclination of the Easy Magnetization Axis in Garnet Films – V. A. Yatsenko, V. A. Bokov, and M. V. Bystrov 1618 146

Cell for Solid-Phase "Anvil-Toroid" Apparatus for the Investigation of the Electric Conductivity of Materials up to 8 GPa – A. K. Butylenko, V. N. Sokolovskii, and G. P. Gazha 1621 148

Chamber with Plungers of Polycrystalline Cubic Boron Nitride for Mössbauer Investigations at High Hydrostatic Pressures – E. V. Kapitanov and E. N. Yakovlev 1623 149

Raster X-Ray Tube with a Target of the "Shoot-through" Type – V. A. Gushchin, V. P. Efanov, S. A. Ivanov, and V. G. Lyuttsau 1626 152

Analyzers of Soft X Rays from Pulsed Sources – A. T. Altyntsev, V. L. Krasov, I. B. Maksyutov, and V. L. Papernyi 1628 153

Measurement of the Diffusion Length of Minority Carriers in p–n Junctions – R. N. Lovyagin and N. R. Semenova 1630 156
Apparatus for the Measurement of the Thermal Conductivity of Solidified Gases at Constant Volume – V. G. Gavrilko and A. I. Bondarenko 1633 158

LABORATORY TECHNIQUES
Modernization of Preamplifier of the SÉS2-03 Spectrometric Installation – V. S. Al'nikov and B. V. Nesterov 1636 161
Installation for Automatic Measurement of the Thermoelectric Power of Small Samples – V. V. Tsurkan, K. M. Golant, and V. G. Veselago 1637 162
Unit for Uniaxial Deformation of Crystals in the Resonator of a Radiospectrometer – S. A. Omel'chenko and S. A. Kulikov 1639 163
Measurement of Temperatures in the Liquid Helium Region under Pressure – E. S. Itskevich and V. F. Kraidenov 1640 164
Reading Unit for Ice Calorimeter – O. E. Zakurenko and V. M. Kuz'michev 1643 167
Adaptation of the "VISHNYA" Rack to Chassis of Other Instrument Systems – N. B. Pakhomova 1644 168
Use of S1-21 Stroboscopic Attachment for the Registration of Nanosecond Signals with Repetition Frequencies up to 10 Hz – L. I. Korshunov 1649 172
Unit for Depositing Coatings by Precipitation of Ions Extracted from a Vacuum-Arc Plasma – V. A. Osipov, V. G. Padalka, L. P. Sablev, and R. I. Stupak 1650 173
Production of Transparent Conducting Coatings of Indium Trioxide – B. P. Kryzhanovskii, B. S. Kolchev, and I. S. Ivanova 1653 176
Sputtering of Reflecting Coatings of Bimetallic Mirrors – E. A. Zevakina, M. G. Kozlov, and G. I. Levin 1655 178
Low-Temperature Attachment for VMR-2 Vacuum Monochromator – A. I. Galuza, A. P. Kirichenko, and E. R. Rudavin 1657 180
Universal Cryostat Attachment for the SF-4A Spectrophotometer – A. A. Andreev and A. I. Vikhorev 1658 181
Stroboscopic Fluorimeter Based on an LGI-21 Pulsed Nitrogen Laser – L. I. Korshunov, I. G. Batekha, V. F. Rachek, and V. D. Shatrov 1660 183
Modernization of the Scanning Block of the DRON-1 X-Ray Diffractometer – Yu. N. Nazarov and Yu. G. Fedorenko 1662 185
Cryogenic Trap for the ÉMR-100 Electronograph – S. I. Kovalenko and N. V. Krainyukova ... 1663 186
Universal Pointlike Capacitive Probe for the Investigation of Semiconductor Parameters – Yu. N. Brovkin, B. V. Zhidelev, S. A. Kostylev, and E. F. Prokhorov 1664 187
System for thorough Purification of Argon and Instrument for the Measurement of the Total Concentration of Electronegative Impurities in Noble Gases and Saturated Hydrocarbons – A. S. Barabash, O. V. Kazachenko, A. A. Golubev, A. N. Zelenskii, and B. M. Ovchinnikov 1666 189

NEW INSTRUMENTS
IBS-1 Nanovoltammeter for Direct Current – A. S. Dadon and L. M. Ioffe 1671 193
PMPT-1 dc Microvoltmeter – A. S. Dadon and L. M. Ioffe 1672 194
Instrument for the Measurement of Short-Time Frequency Instability – A. I. Kanevskii, A. S. Kleiman, D. L. Kreines, K. I. Kalabukhov, V. I. Pestovskii, E. P. Timofeev, N. S. Fertik, and A. M. Yakimenko 1673 195
F7058 Spectrum Analyzer with Tunable Pass Band – V. K. Zhulev, V. V. Nesterov, G. A. Tikhanov, and V. I. Yakimenko 1673 196
D10-01 Harmonic Analyzer for the Investigation of Ferromagnetic Metals – A. V. Blokhin, M.I. Kolodin, Yu. I. Rebrin, V. A. Romanov, and V. A. Sandovskii .. 1674 197
Heterodyne in the Form of a Digital Frequency Synthesizer – O. I. Gubernatorov, S. M. Klimov, A. E. Sosonnyi, V. M. Gorokhovskii, S. B. Samokha, and A. V. Il'chenko 1675 198
Thyristor "Galvanostat-Potentiostat" – V. A. Doktorevich, S. P. Eremenko, and D. B. Sandulov 1676 199

Switchboard Wattmeter Using Static Elements – M. I. Belyi and V. P. Sherstnev 1677 200
Precision Digital Frequency Meter – V. G. Patyukov, S. V. Soldatov, and M. K. Chmykh 1678 201
Frequency Meter – V. S. Gavrilenko, K. A. Sharov, and B. P. Shcherbakov 1678 202
Magnetic Discharge Manometric Converter – A. A. Vydrik and I. V. Fedorenko 1679 202
Submillimeter Laser of Waveguide Type – V. A. Bugaev, V. D. Menenkov, and É. P. Shliteris 1680 203
Scanning Spectrofluorimeter–Densitometer – V. V. Zhiromskii, A. I. Medvedev, V. V. Shichkov, B. I. Medvedev, E. G. Ivanov, and A. A. Shirogorov 1681 204
Installation for Optical Investigations of Materials under Hydrostatic Pressure up to 12 kbar in the Temperature Interval 4.2-300°K – V. S. Medvedev, A. I. Laisaar, V. M. Ermakov, A. I. Niilisk, and V. B. Podolich 1682 205
Heated Vacuum Monochromator for the Spectrum Region 40-280 nm – I. S. Guk and G. G. Kovalev 1683 206
Small Projection System with Brightness Amplifier – K. I. Zemskov and M. A. Kazaryan ... 1684 207
ChARD-3 Frequency-Digical Apparatus for Strain Measurements in Rapid Processes – G. I. Kuznetsov, N. P. Beketov, A. M. Glazkov, A. N. Kravchenko, G. S. Ramanov, and V. N. Timofeev 1685 208
Pressure Pickup with Silicon Strain-Gauge Converter of the Column Type – V. A. Gridchin, R. A. Gavrilova, and O. F. Berenshtein 1686 209
Precision High-Voltage Power Supply – E. L. Kantor and V. V. Lantsov 1687 210
Stabilized Voltage Source – V. V. Danilov and V. V. Koval' 1687 210
